QuickTask Mopping System

Range of flat mopheads and hardware

Flat mops provide a very efficient way to clean and disinfect surfaces as they allow the user to mimic the “pull and lift” action of a wipe thereby physically removing contaminants from the surface.

Contec mop head frames are specifically designed to give good, even coverage with no uneven pressure points. The robust head joint allows controlled movement of the mop head to ensure all surfaces can be reached improving the consistency of the cleaning and disinfection process.

QuickTask mop head frames are available in stainless steel or durable autoclavable plastic. QuickTask Magnetic mop head frames can be used hands-free in conjunction with the QuickTask Hands-free mop head removal tool. The hinged mop frames allows quick and easy replacement of the mop heads encouraging operators to change mop heads frequently in line with best practice.

Each mop head has been specifically chosen to be compatible with a wide range of chemicals and disinfectants including quats and hypochlorite solutions. We can offer one of widest ranges of flat mop heads; from sterile knitted polyester for Grade B rooms to cost-effective microfibre or polyester/ cellulose mop heads.

The mop head frames can be used with a variety of QuickConnect Mop Handles allowing them to be used in all sizes of room and facility. The mop frames and handles are all autoclavable at 121˚C for 30 minutes.

Features	Benefits
Magnetic hinged design	• Easy to replace mop heads promote prompt replacement by operators • Hands-free removal and addition if used with removal tool and saturation system
Constructed from stainless steel or durable autoclavable polypropylene	• Suitable for autoclaving allowing use in highest grade areas • Compatible with most common detergents and disinfectants
Robust head joint	• Allows controlled movement to ensure all surfaces can be reached
Flat contact plate	• Ensures good contact with smooth surfaces with no uneven pressure points improving the consistency of the cleaning and disinfection process
Designed for use with QuickConnect Mop Handles	• Different handles can be interchanged easily and quickly • Extendable and fixed length handles are available to facilitate cleaning in the most confined areas or with the highest ceilings.

Flat Mop Heads

The QuickTask product line consists of a variety of knitted polyester, polyester/cellulose, microfibre/foam, and microfibre flat mop heads that are easily installed onto the hinged mop head frame and handle assembly. Each mop head has been specifically chosen to be compatible with a wide range of chemicals and disinfectants including quats and hypochlorite solutions.

QuickTask Microgenesis MGMP0004/MGMP0005

Lightweight Microfibre flat mop heads

- Lightweight and cost effective
- Ideal for the removal of gross soil and fine particulates
- Allows even release of disinfectant and detergents

TASK0500 / TASK0550

Cellulose/Polyester blend flat mop heads

- Highly sorbent and cost effective
- Suitable for removal of light soils, residues and biofilms.
- Sterile or non-sterile options

QuickTask MHQT MHQT0100/MHQT0150

Two-ply 100% polyester flat mop heads

- Low levels of particle and fibres
- Excellent surface coverage
- Sterile or non-sterile options

TASK0200 / TASK0250

Knitted 100% polyester mop heads

- Cleanroom laundered 100% polyester knit ensures a low level of particulates
- Sorbent multi-layer knitted structure applies solutions evenly
- Sterile or non sterile options

TASK0300

Looped microfibre mop heads

- Exceptional sorbency and mop to dry performance on wet surfaces
- Cost effective as can be laundered and autoclaved
- Highly effective at the removal of liquids, soils, residues and other contaminants

TASK0400

Knitted looped microfibre polyester mop heads

- Cleanest and most durable mop head, very low levels of particulates.
- Exceptional value as can be repeatedly laundered and autoclaved.
- Loops also provide high levels of sorbency and good performance drying wet surfaces.

TASK0600

Polyester microfibre foam flat mop heads

- Microfibe face and foam core construction ensures excellent floor contact and sorbency
- Ribbed microfibre face allows for exceptional cleaning and mop-to dry performance
- Durable and economical

TASK0800 / TASK0850

Microfibre flat mop heads

- 100% polyester single-loop microfibre provides exceptional sorbency
- Ultrasonically cut to reduce fibre shedding
- Available sterile and nonsterile

Mop Head Frames

Choice of flat mop head frame either stainless steel or durable autoclavable polypropylene construction. Lightweight to reduce operator fatigue and encourage compliance. Magnetic versions can be used hands-free with the Contec QuickTask Hands-free mop head removal tool. The mop head frames are specifically designed to give good even coverage with no uneven pressure points.

All frames are autoclavable at 121˚C for 30 minutes.
