

SK electric cables

Cable with special external sheath for permanent immersion according to NF C15-100-AD8 rule ideal for submersible pumps.

Cable suitable for immersion in:

- domestic waste water;*
- water and hydrocarbons mixture;*
- leachate;*
- contaminated sites.*

Resistant to oils, solvents, hydrocarbons diluted 10%.

Working temperature in immersion: max +80 °C in case of wastewater, max +50 °C in case of contaminated liquids.

Maximum immersion depth: 120 m.
