

POWERED STRETCHER SUPPORT SYSTEM

BOB POWER**MAIN FEATURES**

- Non-deformable stainless steel tray
- Longitudinal movement for quick and easy loading/unloading of the stretcher
- Lateral movement system activated via a rear pedal
- Automatic load position and horizontal ascent/descent managed by remote control
- Positive (+10%) and negative (-10%) Trendelenburg position managed by remote control
- Remote control for support configuration with 1.5 meter cable
- Available both with dedicated compartment for spine board/scoop stretcher or without it
- 35 cm foldable stainless steel ramp included.

MANUFACTURED BY PROMEBE

Tested according to EN 1789

Medical Device Class I compliant with EU Regulation 2017/745 - MDR

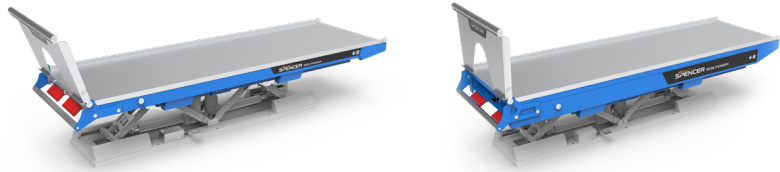

BOB POWER is a powered support for self-loading stretchers designed to improve loading and unloading operations from emergency vehicles. Equipped with a non-deformable stainless steel tray that ensures lasting structural integrity even under heavy use, it offers high reliability, robustness and ease of use.

Thanks to its two actuators, it allows automatic positive (+10%) and negative (-15%) trendelenburg, horizontal ascent and descent, automatic load position and other adjustments via remote control. The 1.5 metre wired remote control offers convenient and intuitive control, while the easily accessible front controls simplify loading and unloading.

Also available with an integrated compartment for safe storage of spine boards or stretchers.
