

HS17P

Handheld Screen

The handheld screen is a multi-purpose accessory that integrates the functions of extended display, parameter configuration and power supply, etc. It is able to extend the handheld monocular's eyepiece display to observe images more conveniently. It is easy to operate and it can adjust the image quickly and supply power to handheld monocular, which improves search efficiency, enriches the outdoor experience, and increases the man-machine working efficiency.

Key Feature

- 720P HD display
- 5-inch LCD touch screen
- Support reverse charging function
- Support display brightness adjustment
- Support palette change
