Vitalograph 4000 SERIES
Respiratory Monitors & Screening Devices

Technical Specifications

Product: Respiratory Monitor
Model Number: 4000
Quality of Blow Indicator: Yes
Accuracy: Better than +/-3%
Range: 0 - 9.99 L BTPS
Sensor: Stator rotor
Flow Impedance: Better than 0.15 kPa/L/s at 14 L/s
Power Supply: AAA batteries
Display: Custom liquid crystal display
Size: 113 x 63 x 48mm
Weight: 55g

Performance Standards:

Safety Standards:
IEC 60601-1:2005

Designed & Manufactured Under:
EU Medical Devices Directive 93/42/EEC (as amended), ISO 13485. FDA 21 CFR 820, CMDR

Respiratory Monitors Supplied With:
Supplied with Vitalograph Reports Software (USB & BT models), 3 SafeTway mouthpieces, carry pouch, guide for healthcare professionals and batteries

Authorised Distributor
The Vitalograph® 4000 series of respiratory monitors are ideal for general screening of chronic respiratory disease within clinical trials and occupational health environments. The USB and Bluetooth™ models make the monitoring of those with chronic respiratory conditions such as asthma, cystic fibrosis, COPD and post transplant patients easier than ever by providing low cost, highly accurate monitoring within the home.

The Vitalograph copd-6™ identifies those at risk of COPD at the pre-symptomatic stage to allow early medical intervention and facilitate better clinical outcomes. Displays include FEV1, FEV6, and ratio.

> Displays % of personal best FEV1
> Colour zones indicate the personal best FEV1
> Stores 200 test sessions
> Automatically assesses test quality
> Quality of blow indicator
> Easy to clean mouthpiece and flowhead

Vitalograph asma-1 & asma-1 Child
Simple, effective asthma monitoring. The asma-1™ is a robust and low cost solution for the home monitoring of PEF and/or FEV1.

> Automatic assessment of test quality
> PEF, FEV1, FEV0.5, FEV0.75
> asma-1 measures % of personal best for PEF & FEV1
> Stores 600 test sessions

Vitalograph lung monitor
Effective home monitoring of key lung function parameters for those with respiratory conditions including COPD, cystic fibrosis and for post transplant patients.

> Displays include FEV1, FEV6, and ratio
> Displays % of personal best FEV1
> Colour zones indicate the personal best FEV1
> Stores 200 test sessions
> Automatically assesses test quality
> Quality of blow indicator
> Easy to clean mouthpiece and flowhead

Vitalograph has simple, effective and low cost solutions available for those engaged in home based respiratory studies or where home based monitoring is required for specific chronic lung conditions. Extensive experience in supporting home monitoring programmes for asthma, COPD, cystic fibrosis and post transplant patients make Vitalograph the ideal telemedicine partner. Bluetooth and USB models available for Apple iOS, Android, Qualcomm and Windows Applications.

Vitalograph Reports Software supplied with USB and Bluetooth models

Vitalograph Reports Software supplied with USB and Bluetooth models
The Vitalograph® 4000 series of respiratory monitors are ideal for general screening of chronic respiratory disease within clinical trials and occupational health environments. The USB and Bluetooth™ models make the monitoring of those with chronic respiratory conditions such as asthma, cystic fibrosis, COPD and post transplant patients easier than ever by providing low cost, highly accurate monitoring within the home.

The Vitalograph 4000 series of respiratory monitors are ideal for general screening of chronic respiratory disease within clinical trials and occupational health environments. The USB and Bluetooth™ models make the monitoring of those with chronic respiratory conditions such as asthma, cystic fibrosis, COPD and post transplant patients easier than ever by providing low cost, highly accurate monitoring within the home.

Vitalograph lung monitor
Effective home monitoring of key lung function parameters for those with respiratory conditions including COPD, cystic fibrosis and post transplant patients.

- Displays include FEV1, FEV6, and ratio
- Displays % of personal best FEV1
- Colour zones indicate the personal best FEV1
- Stores 200 test sessions
- Automatically assesses test quality
- Quality of blow indicator
- Easy to clean mouthpiece and flowhead

Vitalograph copd-6
The Vitalograph copd-6™ identifies those at risk of COPD at the pre-symptomatic stage to allow early medical intervention and facilitate better clinical outcomes.

- Monitors COPD patients using their ‘number’, the obstructive index – FEV1 as a percent of predicted
- Displays FEV1, FEV6, ratio and % predicted, obstructive index, COPD classification and lung age
- Built-in quality of blow indicator
- Displays the GOLD COPD classification (stage I – IV) to help recognise the need for a change in patient management plan

Vitalograph asma-1 & asma-1 Child
Simple, effective asthma monitoring. The asma-1™ is a robust and low cost solution for the home monitoring of PEF and/or FEV1.

- Automatic assessment of test quality
- FEV1 less effort dependent
- Child versions: PEF, FEV1, FEV0.5 & FEV0.75
- asma-1 measures % of personal best for PEF & FEV1
- Stores 600 test sessions
