Risk analysis

Wobbel Original, XL, Pro and Starter

Each Wobbel product is exclusively manufactured by the same reputable EU supplier according to a standardized production process.

Product quality risks

Risk: product manufacturing defects

Description: faults in wood, possible production error, general defects, finish and safety and stability.

Mitigation: each product is checked during seven stages for manufacturing defects. The first time is during the selection of the wood veneers for lamination. The second time is during gluing and pressing. The third time is during shaping. The fourth time is during finishing. The fifth time is during quality control in the packaging phase. The sixth time is upon receipt by Wobbel. The seventh time is during assembling and packaging by Wobbel.

Risk: transport damages

Description: during transport to a final customer there could be damages caused by the transporter. These damages could pose a risk to the end user.

Mitigation: customers are asked to check for any defect upon arrival and if needed report back to us. This is clearly stated in the provided manual.

Risk: transport damages

Description: during transport to a dealer there could be damages caused by the transporter. These damages could pose a risk to the end user.

Mitigation: dealers are asked to check for any defect upon arrival and if needed report back to us. This is clearly stated in the provided manual and dealer terms.

User risks

Risk: breakage and damages during use

Description: the risk of breakage during normal use of the Wobbel board

Mitigation: the Wobbel boards are over engineered to withstand 100 kilograms of continuous use on the Wobbel Starter and 200 kilograms on the other Wobbel boards. The weight limits are mentioned on the website and in the manual

Risk: injuries due to (unintended) use

Description: various injuries can occur when these products are not used in the intended way.

Mitigation: in the manual is an intended use described, and various warnings are given how to and how not to use the Wobbel boards. These contain adult supervision, the use age, clear space around the play area, use on flat surfaces, the correct footwear, appropriate use age, stability, risk for extremities and sleeping in the Wobbel and more. The manual also states what to look for and when in what condition the Wobbel should not be played with.

Wobbel Decks and Pillows

Each Wobbel Deck and Pillow product is exclusively manufactured by the same reputable EU supplier according to a standardized production process.

Product quality risks

Risk: product manufacturing defects

Description: faults in fabric, stitching, zippers, elastic bands, general defects and.

Mitigation: each product is checked during five stages for manufacturing defects. The first time is during the cutting of the fabric and foam. The second time during stitching. The third time during quality control in the packaging phase. The fourth time is upon receipt by Wobbel. The fifth time is during packaging by Wobbel.

Risk: transport damages

Description: during transport to a final customer there could be damages caused by the transporter. These damages could pose a risk to the end user.

Mitigation: customers are asked to check for any defect upon arrival and if needed report back to us. This is clearly stated in the provided manual.

Risk: transport damages

Description: during transport to a dealer there could be damages caused by the transporter. These damages could pose a risk to the end user.

Mitigation: dealers are asked to check for any defect upon arrival and if needed report back to us. This is clearly stated in the provided manual and dealer terms.

User risks

Risk: injuries due to (unintended) use

Description: various injuries can occur when these products are not used in the intended way.

Mitigation: in the manual is an intended use described, and various warnings are given how to and how not to use the Wobbel Decks and Pillows.
