

How to build

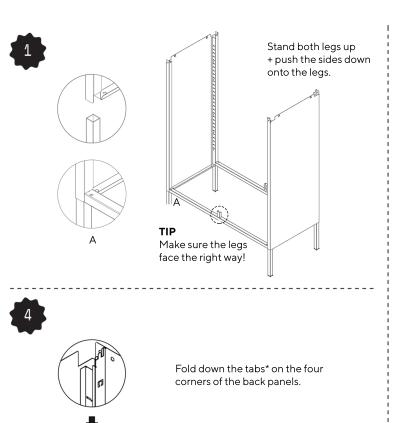

The Midi

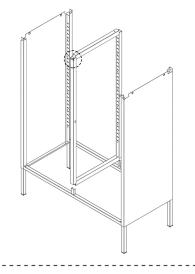

Mustard lockers are beautifully designed to make putting them together simple + argument free! No tears + no allen keys! All you need to get started is a phillips head screwdriver!

We made a video showing just how easy it is taking you through the build step by step. Watch our handy 'how to' video here: mustardmade.com/pages/build-it It's easy, you got this!

We recommend you attach the locker to the wall to prevent tipping + causing injury. Use the screws + plugs provided to screw through the two holes in the back panel.

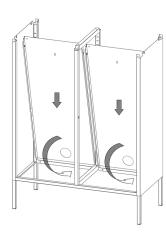

Slot the middle frame onto the legs.

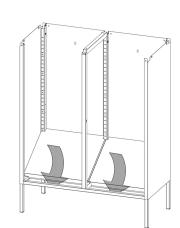

TIP

The slots go at the top!

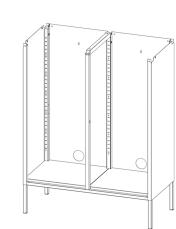

Push the back panels into place, starting at the bottom.

Add the bases, starting at the front.

Push the bases down into place.

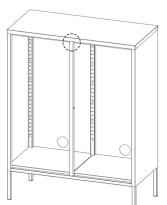

Add the top

panel starting at the front. (You might

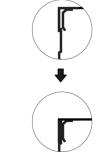

need an extra pair of hands

for this bit!)

Check the side + back panels are slotted in correctly.

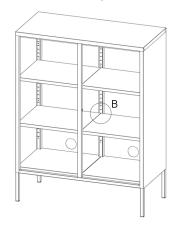

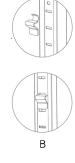

The top should sit in the slot in the middle frame.

Add the brackets + place the shelves on top.

Use the round holes to help you measure the height.

Use your screwdriver to attach the handles with the small screws + small washers.

Ta da! She's all done!

Find someone to give you a high five (it's a little awkward doing it alone!) then fill up your locker with your favourite things!

Small Washer

Begin attaching

the post + large

Then, insert the

lock into place.

L shape post into

position at the top,

washer in the hole at the base of the door frame.
