ANIMAL HEALTH, NUTRITION AND WELL-BEING

FEEDING SUCCESS

PERFORM

ELECTROLYTES

ELECTROLYTES

Replaces those essential nutrients lost through sweating and work

- A powder supplement that contains electrolyte salts specifically designed to compensate for the losses that occur during heavy sweating in horses & ponies
- Recommended primarily for horses that are sweating heavily and in hard work but it is also suitable for use when the weather is very hot or if your horse sweats when travelling

Additional care for performance, well-being and recovery

Replaces those essential nutrients lost through sweating and work

Electrolytes is a complementary feedingstuff specifically for horses & ponies.

Composition

Sodium chloride, Calcium gluconate, Magnesium sulphate, Dextrose, Potassium chloride

Analytical Constituents

Crude Protein	0.18%
Crude Oils & Fats	0.005%
Crude Ash	57.0%
Calcium	1.7%
Sodium	16.5%
Potassium	4.5%
Magnesium	1.6%
Chlorides	29.5%

Additives

Nutritional Additives

Copper (Copper (II) chelate of glycine hydrate/3b413)	333mg/kg
Manganese (Manganous sulphate monohydrate/3b503)	500mg/kg
Manganese (Manganese chelate of glycine, hydrate/3b506)	500mg/kg
Zinc (Zinc sulphate, monohydrate/3b605)	266mg/kg
Zinc (Zinc chelate of glycine hydrate/3b607)	500mg/kg

Technological Additives

Sepiolite/E562	2,500mg/kg
----------------	------------

This product is recommended:

- If horses are sweating heavily
- If the weather is very hot
- For horses competing on low levels of feed
- If horses are poor travellers
- During and after endurance rides
- If horses sweat lightly but regularly when competing and are being fed a 'non-competition' diet

Feed 12g/100kg bodyweight per day.

For example:

200-400kg horse

approx 0.5-1 scoop per day

400-600kg horse

approx 1-1.5 scoops per day

Scoop enclosed = 50ml

This product can either be added to a feed or can be mixed in water. In order to replenish electrolyte loss when in hard work, this product should be fed for up to 3 days post-work.

Added to the feed: Mix well in slightly dampened feed, with clean, fresh water available in suitable quantities. Hot, sweaty horses should be offered small quantities of water frequently as required until the horse has cooled and recovered, before feeding Electrolytes.

Mixed in water: 1 scoop of Electrolytes mixed in 2.5 litres of water produces an isotonic oral rehydration solution. This can be offered during competition (e.g. endurance rides) and after work. At no stage should the horse be discouraged from drinking, and fresh, clean water should be available at all times.

It is recommended that a specialist's opinion be sought before use. Do not exceed the recommended feeding guide without consulting Dodson & Horrell or your veterinarian.

The best before date is shown together with the batch code on the lid. Store in a cool dry place.

Do not feed to sheep, Angora or Pygmy goats.

Registration No: GB286A10317 / GB033E0557

Dodson & Horrell products are manufactured to a strict code of feed safety. For further information please visit www.dodsonandhorrell.com

Pack sizes:

Available in 2kg, 5kg and 15kg

Shelf life:

24 months from date of manufacture
