## Feeding Guide

Remove handle from bucket and place in a suitable container or bracket. Alternatively fix bucket to a suitable stake along with a strong strap, out of the reach of grazing sheep.

When horses are grazing alone, the bucket may be placed directly on the ground but check regularly for splits and damages. The bucket can also be used in the stable by placing it in a manger, trough or bracket.

This block is suitable for all types of horses and ponies. The desired consumption rates are:

<b>Pony</b>	<b>50-75g per day</b> or about 500g per week
<b>Horse</b>	<b>100-150g per day</b> or about 1kg per week

**Do not overfeed – withdraw the block if necessary or feed every second day to control weekly intake.**

The best before date is shown together with the batch code on the bucket. Store in a cool dry place. **Do not feed to sheep, Angora or Pygmy goats.**
