

# I-PLUG

## PRODUCT DESCRIPTION

I-PLUG is a ultra-quick setting waterproof mortar, ideal for immediately closing water leaks.

## PRODUCT APPLICATION

- Quick sealing of localised water flows, including pressurised
- To rapidly prepare and finish waterproofing
- To seal cracks, together with hydro-expansive mastic AKTI-VO 201

## ADVANTAGES

- Excellent waterproofing
- No shrinkage
- Instantaneously block water flows, even if pressurised
- High mechanical resistance
- Easy workability
- Rapid-setting

## PREPARATION AND APPLICATION

Create the seats for product application before starting, with width and depth of at least 2-3 cm, making sure there are no protruding concrete parts on the surface and roughen the surface, if necessary. Clean the surface from any loose parts, salt, traces of grease and anything that could prevent even adhesion at the product to the wall surface. Prepare the product mixture in small quantities preventively pouring water into the container (1/4 l per kg of product, equal to 24%) and then add the pre-mixture by mixing quickly with trowel until you obtain a homogeneous and malleable consistency. Work the mixture by hand for approximately 15"/30", based on the ambient, water and product storage temperatures, i.e. until it begins developing heat. Immediately apply, by firmly pressing the mortar in the opening and holding it in position until it finishes setting, 1' without moving your hand during this time interval. The product must be mixed with warm water if the temperature is low.

## CONSUMPTION AND YIELD

A 10-kg bag of the product yields 6 l of mortar.

## PACKAGING AND STORAGE

The product is available in deaerated and sealed 10 kg polyethylene bags.  
The products must be stored in a dry and indoor place at a temperature between 15 °C and 25 °C.  
Do not expose to direct sunlight.

## WARNINGS - IMPORTANT NOTES

The product mixed with water must be used immediately.  
Never regenerate the mixture by adding water.

## PHYSICAL AND TECHNICAL SPECIFICATIONS

-	Initial setting time	Final setting time
Temperature at 20 °C	50"	60"
Temperature at 5 °C	140"	160"
Parameters subject to company Quality Control	Values	
Specific weight	> 1.95 kg/l	
Compressive strength:		
after 1 hour	> 20 N/mm <sup>2</sup> (UNI EN 196-1)	
after 1 day	> 40 N/mm <sup>2</sup> (UNI EN 196-1)	
after 28 days	> 50 N/mm <sup>2</sup> (UNI EN 196-1)	
Flexural strength:		
a 1 h	> 2 N/mm <sup>2</sup> (UNI EN 196-1)	
a 1 g	> 3 N/mm <sup>2</sup> (UNI EN 196-1)	
a 28 gg	> 4 N/mm <sup>2</sup> (UNI EN 196-1)
