DATALOCKER®
SIMPLY SECURE

ENCRYPTDISC®
SELF-ENCRYPTING OPTICAL MEDIA

EASY-TO-USE, SECURE, AFFORDABLE SHARING

EncryptDisc combines 256-bit AES encryption and disc burning functionality, all self-contained on a recordable CD or DVD. EncryptDisc offers built-in software for disc burning and government strength FIPS 140-2 validated 256-bit AES encryption.

There's no software to install and no need for third party software applications. EncryptDisc addresses the needs of users who require a simple, highly secure method to transport, share and archive sensitive data and records. EncryptDisc is the proven choice for low-cost, high capacity encrypted media that adheres to HIPAA, SOX, HITECH and other industry standards.

FEATURES OF ENCRYPTDISC

Easy to Use. Simply insert EncryptDisc & create a password when prompted. Drag and drop files then finalize the disc.

Military Grade Encryption. Protected with government certified FIPS 140-2, 256-bit AES crypto library. File name encryption now available.

Securely Share. Users can easily share EncryptDisc from PC to PC as closed (CD/DVD ROM) or open discs for additional updates.

ADDITIONAL FEATURES

Ink-jet printable surface allows you to create a custom disc with your own input fields and/or confidentiality disclaimers.

Autorun software does not require any third-party burning software. (If autorun is disabled, double-click *OpenEncryptDisc.exe* to launch.)
