

# SOTT

Introduces:

# High Gloss Carbon Fiber

In 2004 SOTT was the first in the world to introduce a high-gloss carbon fibre film with a width of 60" (152cm) called MONZA.

This was followed by many variants of different brands, both matt and textured and with a tangible structure. SOTT was never much of a fan. SOTT wanted better, more realistic. And we did it!

Behold the successor to our old Monza film:

 **Elemento-6**™

The most realistic carbon fibre film ever produced

- High gloss with a smooth finish
- 3D conformable
- Repositionable solvent adhesive
- Micro air channel technology

A high gloss 3D malleable cast film with a woven carbon fibre pattern between the two PVC layers. The high gloss transparent coating creates a marvelous sense of depth when the film is bent. The pattern remains very nicely intact when installed on convex and concave surfaces.

SOTT Elemento-6™ is extremely conformable and ideal for automotive as well as industrial and marine applications.

## PROPERTIES (shortened; see the technical data sheet for full details):

Multilayered cast - repositionable adhesive with air channels (AS™ system)

|                        |   |
|------------------------|---|
| <b>Product number:</b> | W-1917 Elemento-6   |
| <b>Roll width:</b>     | 152cm (60")   |
| <b>Roll length:</b>    | 22,85m (25yd)   |
| <b>Stretchability:</b> | 190%*   |
| <b>Dikte:</b>          | 85-140 micron (2.3 - 5 mil) (depending on color and special aspects of film)        |
| <b>Adhesive:</b>       | Automotive-X SOTT-AX44RPS acrylate solvent with micro air channels, repositionable. |
| <b>Structure:</b>      | Unique MLS system (consists of several layers)                                      |

\* Read: stretches 90% beyond its original size.

\*\* When applied with SOTT installation technique. Read: InstallationGuide SOTT-IG-03.
