

DECAY TRAY

Decay Tray is a celebration of material originally destined for burial in a landfill. Made from Danish truffle beech - the definition of wood that was previously refined with various fungi - the Decay Tray is up-cycled waste wood with a beautiful pattern of decay. The surface of the wood has a marble-like and strong structure, making each tray beautifully different from each other.

Treated with a food-safe lacquer making it useful for serving purposes.

ITEM NO.	90301 Medium 90302 Large
DESIGNER	Mater
MATERIAL	Truffle Beech
FINISH	Food-safe lacquer
ORIGIN	Wood from Denmark
