## CLEANING TOOLS

---

### Hand Broom - Medium

Medium soft hand broom for dust and light dirt. 340 x 35 mm.

---

### Dustpan - With clamp system

Dustpan with clamp system. To be used together with Medium Hand Broom. 295 x 320 mm.

---

### Scrub Brush - Hard - 30

Deck Brush/Scrub Brush with hard fibre for heavy dirt on boat decks, paving, and jetties. 300 x 50 mm.

---

### Combination broom - Hard/Soft

Broom with hard and soft fibres. The hard fibre loosens the dirt, while the soft fibre sweeps it up.

---

### Floor squeegee - 30

Use to dry smooth, wet floors with a lot of dirt and water. 30 cm.

---

### Scraper - Anti-fouling paint remover

Scraper with flexible stainless steel blade. Can be attached to handle. Perfect anti-fouling paint remover. 80 mm.

---

### Sanding pad holder - Handle Model

Flexible holder with super grip for sanding pads. Can be mounted on a handle. 230 x 100 mm.

---

### Brush - Extra Soft

Brush with soft split fibre. Rubber edge prevents scratching.

---

### Canvas Brush - Extra Soft - Long handle

Brush with soft split fibre. Rubber edge prevents scratching. Especially for boat hoods, tents, and soft convertible tops.

## CLEANING TOOLS

---

### Wash brush - Extra soft

Water-permeable wash brush. With soft split fibres. Water-saving system. Rubber edge prevents scratching.

---

### Wash brush - Extra soft - Handle model - 30

Non-permeable wash brush. With soft split fibres. Water-saving system. Rubber edge prevents scratching. For boats, caravans, and cars. 30 cm.

---

### Wash brush - Extra soft - Handle model - 26

Water-permeable wash brush. With soft split fibres. Water-saving system. Rubber edge prevents scratching. For boats, caravans, and cars. 26 cm.

---

### Wash brush - Extra soft - Handle model - 36

Water-permeable wash brush. With soft split fibres. Water-saving system. Rubber edge prevents scratching. For boats, caravans, and cars. 36 cm.

---

### Hanging storage system 50 cm

Wall rack, complete with 2 clamps Ø 28-38 mm, 1 hook and logo. 50 cm.

---

### Plastic handle - Stays afloat - 150

Very strong. One-piece, ergonomic, lightweight handle. With suspension eye. Stay afloat. 150 cm.

---

### Plastic handle - Stays afloat - 130

Very strong. One-piece, ergonomic, lightweight handle. With suspension eye. Stay afloat. 130 cm.

---

### Plastic handle - Water-permeable - 140

Water-permeable handle with Gardena® attachment.

---

### Telescopic handle 180 cm

Water-permeable handle with Gardena® attachment. 100 - 180 cm.

---

### Telescopic handle 280 cm

Water-permeable handle with Gardena® attachment. 170 - 280 cm

CLEAN ♡ PROTECT ♡ CARE

## ULTRAMAR CLEANING TOOLS

Ultramar's cleaning tools are made of high quality recycled plastic. It's waste leftover from the hygienic brush production process. It's a small but important step. We're using fewer raw materials. They're high quality and they last longer, so you won't have to replace your brush as often. It's a real win-win.

### Ultramar Cleaning Tools: a small step towards a better world!

#### Why Ultramar Cleaning tools?

- Made of recycled plastic
- Durable and lightweight
- Ultra long-lasting
- Made in Europe
- Special rubber bumper prevents scratches
- Split-fibre tips retain water longer for better cleaning
- Water-permeable brushes and handles
- Advanced water saving click system
- The water fills the chamber in the brush and is dispensed by fibre bundle. The water is applied directly onto the cleaning surface so you don't waste water. The split-fibre tip washes is self-cleaning.
- High fibre quality means the fibres stay intact
- Safe and easy suspension system

#### Recycled material

Both the fibres and the plastic are made of recycled material (98% recycled, 2% ink). The percentage of recycled material varies from product to product, as we also use other materials like aluminium, in addition to plastic.
