

MIMIC MIRROR

Normal Studio ON THE DESIGN "Mimic Mirror came from the idea of creating a table mirror that had a sculptural character, giving the design a strong expression that would make it at once an object of decoration and use. The mirror is a study of repetitions, seen with the graphic, triangular pattern on its back along with the reflection of its front glass and sculpted facets of the base. We wanted for the design to exist in harmony with the space in which it is present while adding to the atmosphere of the room through its characteristic expression. Bringing a new perspective to the traditional table mirror, Mimic has a playful appearance while serving its intended function with a friendly ease."

ABOUT THE DESIGNER

Normal Studio is a Paris-based design studio, founded in 2006 by Jean-François Dingjian and Eloi Chafaï. In their work, the duo attempts to promote elementary design that goes beyond trends and fads to create objects that will have a longstanding lifespan through timeless expressions. Designs by Normal Studio are part of the permanent collection of Paris' Musée des Arts Décoratifs and featured in various contemporary art foundations throughout France.

DESCRIPTION

Mimic Mirror is all about repetition of pattern and reflections. Its sculptural appearance en-

riches a room even when not in use. Place the mirror in the bathroom, bedroom, hallway or as a decorative object in the living room.

PRODUCTION PROCESS

The top part of the mirror is produced using a high-pressure plastic injection method. The body of the mirror is painted with a clear rubber coating to give the surface a soft finish. The mirror glass is cut and the edges polished, before it is glued into its frame.

MATERIAL

Base in resin, mirror-back in injection-molded ABS with soft coating.

CLEANING AND CARE

Wipe off with moist cloth and remove excess liquid with dry cloth.
