

B28 Handy

B28 is a light and very nestable hand basket with a capacity of 28 litres.

Made in the same style as the rest of the Polycart products, it has been designed having in mind the comfort of the user, with the Easy Hold ergonomic curves which reduce the effort of the buyer by letting the arm rest in a more natural position, closer to the body. It has a foldable handle with a retention system that avoids it from folding by itself. The handle offers a very comfortable grip.

It is an ideal basket for small stores, convenience stores and also for supermarkets. Thanks to its reduced size and nestability it is possible to place a good number of baskets anywhere in the store. It can be made in many different colours to match the corporate image of the brand.

MEASURES
