G-kit Bonanza 0,35m2

Installation instructions

Versie: Eng 2018-9

G-kit Bonanza 0,35m2:

Specifications:

Material: aluminium extrusion profiles

patented plastic g-tools corner connectors

moist and fire resistant PVC/XPS sandwich panels

Dimensions: external (h x w x d): 176 X 61,5 X 61,5cm

internal (h x w x d): 161 X 58,5 X 58,5cm

Items below are only delivered when you've bought a complete version:

Timer Legrand Omnirex

minimum switch on period 15 min.

230V, 50Hz, 16A

maximum capacity 3680W

Ventilator Winflex 125 VKO in line axial ventilator, 185m3 / hour

Lighting E.T.I 250 Watt, Powerlux reflector, Sunkraft 250 Watt or

Hanspanel 100 Watt or G-Leds 140 Watt

Filter maximum air flow: 240 m3/hour

optimal air flow: 160 m3/hour

hight: 250mm

diameter filter: 190mm diameter flange: 125mm

weight: 1,5kg

Warranty procedure:

G-tools offers a 2 years warranty on all components of the Bonanza except bulbs and filters. Please contact your G-tools rep to explain the problem as there might be an easy fix without having to replace a part.

Maintenance and safety regulations:

The G-Kit Bonanza is a maintenance free object. Never the less there are a few factors to take into account.

- Only use grounded wall outlets to plug the Bonanza in.
- Do not plug the Bonanza into the wall outlet untill the machine is fully assembled and you have read instructions.
- Avoid contact of water with all electrical equipment
- When changing the light bulb always unplug the Bonanza from the wall outlet.
- Make sure the light bulb has had plenty of time to cool of before touching it.
- After screwing in the HPS bulb wipe finger prints of the bulb with a clean dry cloth to ensure its full life.
- Wait 20 minutes after the light has turned of before turning it on again.
- It's recommanded that no more than 1 G-Kit Bonanza goes on a single 15A breaker. We also recommend the Bonanza is plugged into a surge protector. This will protect the machine from any power spikes due to storms, power outages, etc.
- Avoid contact with water with the non-laminated sides of the panels.

G-kit Bonanza 0,35m2:

Box A: top + bottom panel-box 62 x 62 x 30cm

Amount	Description	Length (mm)	Width
1		c1.7	c 1 5
1	roof panel in alu frame(with timer,	615	615
	fan, filter, silencer and light*)		
1	bottom pannel in alu frame	615	615
4	aluminium flat profile middle	534	
4	aluminium angle profile	505	
4	adjustable feet	80	
4	connector piece 4-way		
4	handle with screws and washers		
3	air inlet		
1	plug*		
4	plastic U profile	530	
1	cable through entry		
1	flange ∅125mm		

Box B: panels - box 120 x 73 x 5cm

Amount	Description		Length (mm)	Width
2	side panels top left and rig	side panels top left and right		563
1	back panel top with:	-1 x hole ∅121mm	1028	563
		-3 x hole Ø 76mm		
		-1 x hole Ø 21mm		
3	side and back panels bottom left and right		533	563
1	door bottom		528	295
1	door bottom with weather strip		528	295
1	door top		1014	295
1	door top with aluminium strip and weather strip		ip 1014	295
4	aluminium angle profile		1000	

Total packing 2 boxes (without box or pallet)
Items marked with a * are only part of a complete version.

G-kit Bonanza installation instructions:

1. General:

To prevent transport damage the bottom and roof of the cabinet are connected with 4 aluminium profiles. These profiles serve no further purpose and can be thrown away. Push the 4 aluminium adjustable feet on the plastic insert connectors underneath the bottom panel. Place the 4 aluminium angle profiles (50,5cm) on the 4 connecters and place side and back panels and the doors. The door with the weather strip slides through the rail in the back so te strip seals the gap where the doors overlap. Make a ring with the 4 flat profiles (53,4cm) and the 4-way connectors.

Place the ring on top of the 4 profiles and push tight.	
Place the 4 aluminium angle profiles (100 cm) on the connecters and place the side panels and the back panel with the holes.	
Place the roof panel (with the filter, light and timer) on top of the angle profiles and push tight. Mount the 3 G-tools air inlets (see chapter 2)	
Pull the electricity cord through the cable through entry. (only when you've bought the complete version)	

Mount the cable through entry in the 21mm hole in the back panel of the cabinet and mount the supplied plug. Push the flange through the hole in the back panel in to the silencer. From outside to within. Hang the lamp, set the timer (chapter 3) and place the doors (chapter 4) The door with the aluminium profile and weather strip slides through the rail in the back so the strip seals the gap where the doors overlap.

Overview installation components:

2. The air inlets

Each air inlet consists of 2 parts.

- -Push part 1 inwards through the hole in the back.
- -Push part 2 on part 1 and twist & lock.

3. Setting the timer

- a. Set the switch on the right side of the timer at the clock symbol.
- b. Set the current time by turning the dial of the timer.
- The pins in the outer ring mean:
 Positioned outside OFF
 Positioned inside ON

Set the timer for lights ON by pushing the pins inward

4. The plastic door profiles

In order to have better access to your plants both top doors are removable.

Place the four plastic U profiles (Z2) in aluminium profile J. Two in every profile. The plastic profiles should be placed on top of eachother. The top doors will slide through this profile. (see picture 6). The doors can now be simply removed by lifting them and pulling them towards you.

Frequently asked questions (F.A.Q.'s)

How much will my electricity-bill go up?

For a G-kit Bonanza 0,35m2 model with 250 W HPS:

When the lights are on for an average of 14/hours /day: approx.. €25,-/ month

For a G-kit Bonanza 0,35m2 model with Hanspanel 100W:

When the lights are on for an average of 14/hours /day: approx.. €9,-/ month

Won't the cabinets get to warm?

Normally it gets 5 to 6 degrees warmer inside the cabinet than outside.

It's best to have it in a room where you can leave a window open.

If you have more than one G-Kit in a room make sure that the light of one switches on when the light of the other switches off (the lights are on 12 hours a day).

The humidity is too low, what to do?

Especially in the beginning it is important the plant get enough water. To spray them with water in the first two weeks is the best.

Is it possible to put a G-kit in a barn or garage?

No problem, make sure there is enough fresh air and keep it warm in the winter.

Do I get warranty?

There's a one year warranty on all electrical equipment except for the light-bulb and filter. New parts shall be send to you after the broken parts have been received at the distribution center.

Manual

WEEE registration number: DE 68161470

The symbol of the crossed-out wheelie bin on electrical and electronic equipment means that it mustn't be removed in household waste. There are free collection points for the return of WEEE available nearby. Please inquire at your city or municipality about the addresses. You can also contact us regarding other options to return old equipment. By separate collection of WEEE, the reuse and recycling of old equipment are made possible and any negative impact on the environment and human health due to hazardous substances in old equipment is eliminated. You are responsible for the erasure of any private data which could still be stored on old equipment. Further information can be found on www.elektrogesetz.de.

—— DEUTSCH ——

Das Symbol des durchgestrichenen Mülleimers auf einem Elektro- oder Elektronikgerät besagt, dass dieses am Ende seiner Lebensdauer nicht im Hausmüll entsorgt werden darf. Zur kostenfreien Rückgabe stehen in Ihrer Nähe Sammelstellen für Elektro- und Elektronikaltgeräte zur Verfügung. Die Adressen erhalten Sie von Ihrer Stadt- bzw. Kommunalverwaltung. Sie können sich auch an uns wenden, um sich über weitere, von uns geschaffene Rückgabemöglichkeiten zu informieren. Durch die getrennte Sammlung von Elektro- und Elektronikaltgeräten soll die Wiederverwendung, die stoffliche Verwertung bzw. andere Formen der Verwertung von Altgeräten ermöglicht sowie negative Folgen bei der Entsorgung der in den Geräten möglicherweise enthaltenen gefährlichen Stoffe auf die Umwelt und die menschliche Gesundheit vermieden werden. Sie sind verantwortlich für die Löschung von möglicherweise auf den zu entsorgenden Altgeräten vorhandenen personenbezogenen Daten. Weitere Informationen finden Sie auch auf www.elektrogesetz.de.
