

Pinta In-track

The Pinta In-track is our newest addition to the Pinta series. We combine elegance with efficiency with its In-track adapter.

Powerful, passively cooled LED track spot, with integrated driver. The high luminous flux, its beautiful color rendering and compact design characterize the Pinta In-track as an all-rounder for your lighting projects.

In addition to Dali, the Pinta In-track is also available as a BlueDim version, so that you can operate each individual fixture with your smart device. This way the light experience can always be adjusted as desired.
