

At Philips Respironics, we created Pico with a definitive goal in mind — to create a truly appealing traditional nasal mask that makes minimal contact with the face and offers simplicity, comfort and seal. These qualities make it an ideal choice for new and existing sleep apnea patients who want minimal disruptions to their lifestyle.

Pico is the lightest and smallest traditional nasal mask on the market*

Pico offers a practical alternative that is comfortable, easy to use, and easy to set-up — while providing a high level of therapy. In fact, clinicians rated Pico easier to use than the leading traditional nasal mask, making it ideal for your installed base optimization and new patient set-ups*

Pico comfortably fits more than 98% of patients*

Pico offers patients a simple-to-use mask that maintains its seal through the night, and offers the freedom to do things like watch television with their mask on their face.

*Data on file. Internal Marketing Survey 2013.
