

Take the measurements of your mattress

Remove all the sheets from your mattress

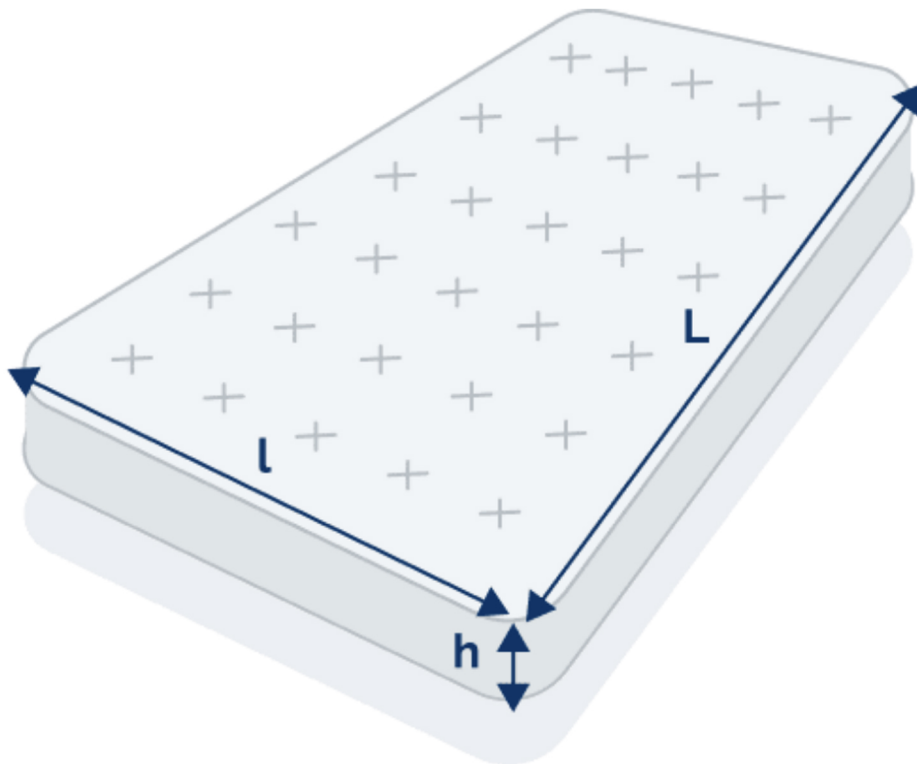

Choose the size of your fitted sheet

Add a safety margin of 2 cm

For example: if your mattress is 19 cm high, choose a cover that is at least 21 cm high.

Info – Texaal® Cotton: to anticipate the natural shrinkage of cotton, an additional margin is added during the manufacturing of Texaal® Cotton anti-dust-mite covers (1.5 to 6% depending on the fabric batch). The size of the product received will be larger than the size ordered. The final size will be reached after a few washes.
