

JAGUAR
— SWISS MADE —

A passion for precision and attention to the finest details

These are the core values that have been, for over 70 years, the backbone of the Jaguar watch collection. Since the Swiss watch maker Peter Haas founded the watch brand in 1938 the brand has built itself a reputation for creating strong, powerful yet elegant watches, inspired by the very animal it is named after.

The heritage of the brand is being continuously enriched thanks to the policy of constant new product development which is one of the cornerstones of the Festina Group's modern and international business strategy.

The Jaguar brand's quality and Swiss precision is synonymous of business excellence and satisfies the most demanding public in their search for a timepiece that combines total reliability with contemporary elegance.

J-MOTION

The excellence of a multifunction with chronograph

The Jaguar brand is proud to present the new J-Motion, a brand new collection of chronographs which is a subtle mix of trendy design, elegance and in-house technological innovation. This collection introduces a quartz multifunctional retrograde movement entirely made and produced in Switzerland by Soprod, a Festina Group company.

The singularity of this movement lies in displaying the bidirectional functions, which is possible thanks to a set of independent micro-motors which drive the hands. This high-tech retrograde movement enables an up-to-date and original way to display the time.

The watch, created in 316L stainless steel, displays the normal time with hours, minutes, seconds and an AM/PM indicator. By pushing the crown, the watch becomes a 1/10th of second chronograph. All the watch hands have a retrograde function which gives extra life to the dial and creates an impressive effect of movement.

CHRONO MODE

Push the crown to select Local Time or Chrono mode.

J-MOTION

The J658 model with square case, also made in 316L stainless steel, has a window at 9 o'clock indicating when is in Local time or Chrono mode. The luminescent central hour and minute hands show either the watch or chronograph times. In the Chrono mode, the counters with retrograde hands situated at 6 and 12 o'clock measure the minutes and 1/10th of seconds of the chronograph, respectively.
