

Hy spray

A rapid disinfection of rooms
by air pulverization!

Analís commercializes and develops the products and technology of Hymetec. They act effectively on any kind of infection in order to ensure the best possible hygiene.

Hyspray is a pulverizing appliance that rapidly disinfects rooms and surfaces by using the HyPro technical solution.

Technical Information

- Hyspray is a light, ergonomic pulverization device.
- It disinfects volumes of 5m³ to 165m³.
- The diffusion time is 11 min for 50 m³.
- Voltage: 230V or 115V.

Applications

Hyspray can be used with a disinfectant based on 7% hydrogen peroxide.

It is suited for operating rooms, intensive care, emergency units, mobile units, ambulances.

Other Hymetec products

- HyPro medical is a 3% hydrogen peroxide solution. It allows efficient cleaning and disinfection of surfaces and non-invasive medical tools. For more details, refer to the technical data of HyPro medical.
- HyPro technical is a 7% hydrogen peroxide solution. It allows efficient disinfection of surfaces and non-invasive medical tools by pulverization. For more details, refer to the technical data of HyPro technical.

Hyspray is not a medical device.
