Home Center 2 in your home

Home Center 2 installation is easy and doesn't require any changes in electrical installation. System based on a Z-Wave technology uses FIBARO micro-modules and sensors which connect to the electrical systems you already have at home. Their versatility enables total control over hundreds of different scenes and increases your comfort and safety at the same time.

The house that thinks for you

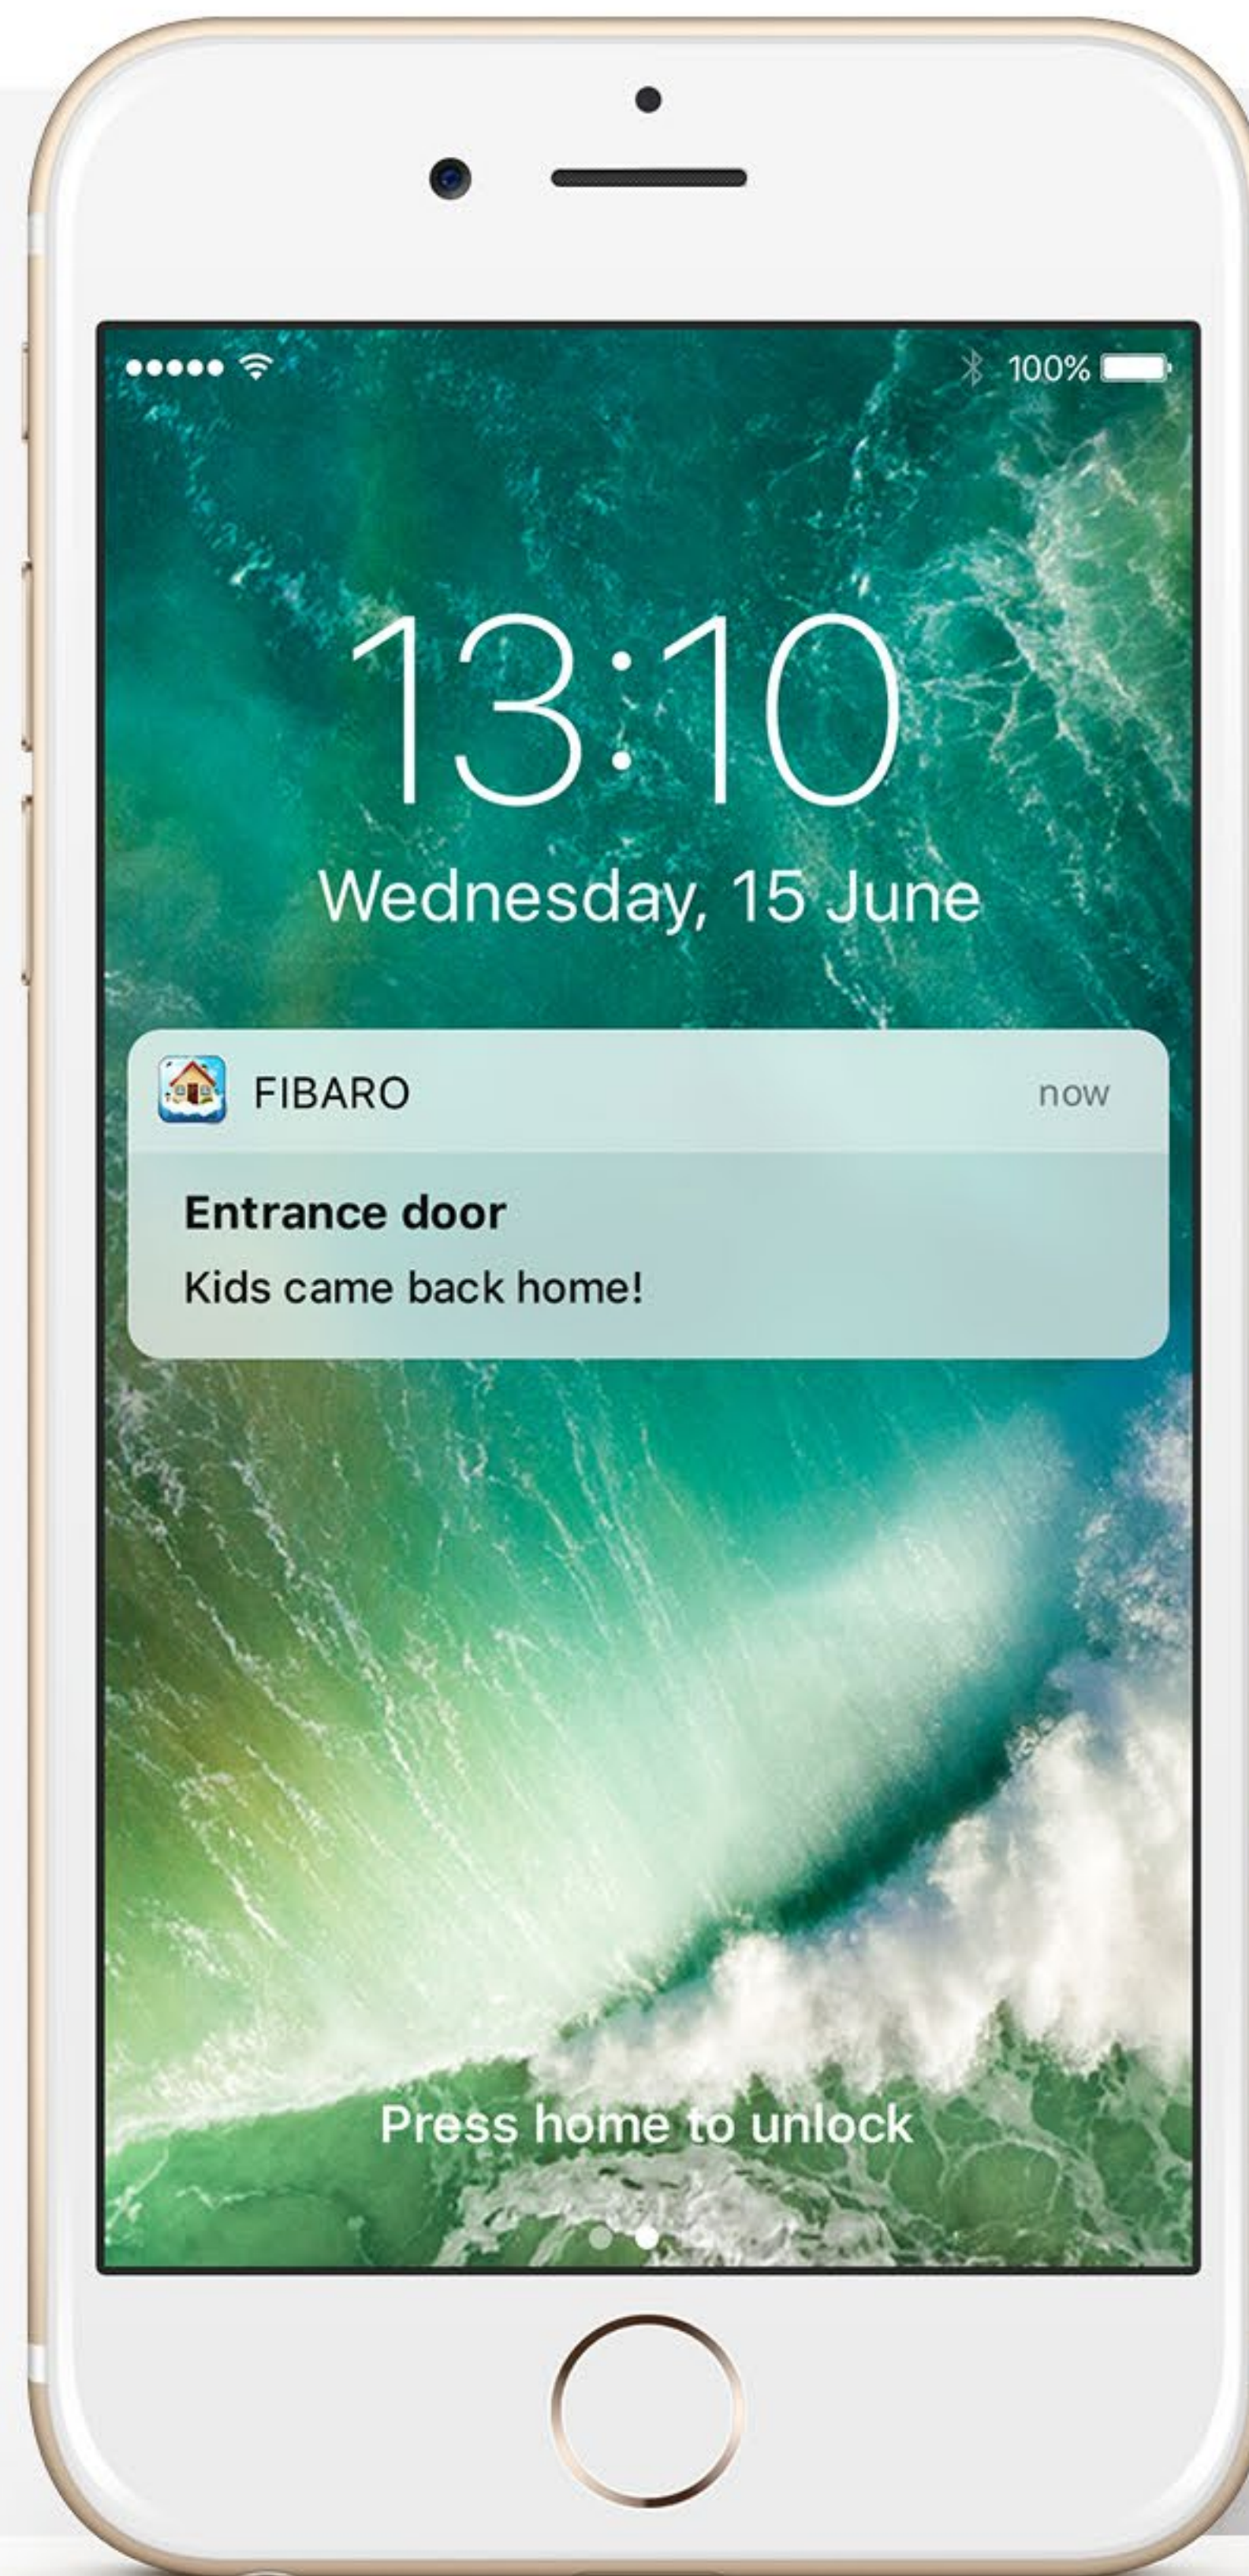

Temperature and lighting adjusted to individual needs of household members, time of the day and season. Automatic gate and door opening when you're near or opening roller blinds in the morning when the house feels you're awake. Remote control over electrical devices both for pre cautious and forgetful. Power metering to know how to optimize energy expenses in your home. FIBARO smart home offers comfort, safety and savings so that you have everything to enjoy your life and sleep tight.

A modern two-story house at night, illuminated from within, showing a swimming pool in the foreground and a cityscape in the background under a starry sky. The house has large glass windows and doors, revealing a bright interior with a living room, dining area, and a staircase. The pool is lit with blue lights, and the city lights are visible in the distance.

FIBARO

New image of comfort

Thanks to mobile devices compatibility Home Center 2 watches over your close ones and will do everything to prepare the house before you come back from school, work or vacations. Geolocation function will inform your house and you via smart phone notification about family members getting closer to the house. You will know that the kids got safe and sound from school and that a chilly living room is waiting for your wife.

Safety above all

*MOTION DETECTED
CALLING POLICE*

Home automation devices cooperating within FIBARO system, the brain of which is Home Center, constantly monitor your safety. After configuring motion, flood, smoke and CO sensors with your alarm system, not only will you be immediately informed about the danger via the app, but most of all, your house will respond to that emergency, by cutting off the water valve, turning on the light illumination and sound alarm or closing the roller blinds.

Saving money along the way

FIBARO smart home is safe, comfortable and energy saving. Thanks to FIBARO and it's app clear you can monitor how much energy the devices in your home use at given time. You can also analyse how to optimize expenses for heating and lighting.

Create your own smart home
