

BLASTBOT

Smart Control

Blastbot is an internet connected smart device that allows you to use all your remote controllers from your smartphone, tablet or computer, even if you are away from your home or office. Blastbot controls:

- ▶ Air conditioners
- ▶ TV and set-top box
- ▶ Audio Systems
- ▶ AppleTV, Roku and other Media Managers
- ▶ DVD and Blu-Ray players
- ▶ Any devices with an Infrared receiver

With Blastbot you can set automatically the right temperature of your A/C during the night, create custom scenes to prepare your TV room for a movie night, wake up everyday with the news, or simply, turn on your A/C before arriving home.

- ▶ Remote access with an App from a smartphone, tablet or PC.
- ▶ Control multiple devices.
- ▶ Schedule task and adjust frequency (one specific day, daily, each hour, twice a week).
- ▶ Scenes customization.
- ▶ Sharing controls between users.
- ▶ Temperature sensor and logging.
- ▶ Works with Alexa and Google Home.
- ▶ Connect an IR extender cable.
- ▶ IR learning mode.

Works with Fibaro

Blastbot Smart Control connects directly to the user's WiFi network and allows the emission of infrared signals to the device to be controlled using a simple http API from the Fibaro Home Center 2 or Home Center Lite.

BLASTBOT

Technical Specifications

Power Supply:	5V 1A
Consumption:	71mA during standby 500mA during transmission.
Available at:	iOS, Android & web browser.
Brand:	Markerlab®
SKU:	BCD01
Warranty:	One year.
Each unit includes:	AC adapter 5v/1.0A and USB cable.
Frequency:	2.412-2.462
Frequency unit:	Ghz
Max output power:	36.4
Max output power unit:	mW
Connection Pattern:	Tx & Rx
UPC:	606110108836
