

LAUNDRY ADVICE

We recommend that you wash our products at a maximum temperature of 40°C. Do not use too much laundry detergent and preferably a liquid one without bleach. Do not overload the washing machine, as this can cause fibres to degrade.

We also recommend removing laundry from the washing machine immediately after this has been washed. Ideally, the products should be dried in outdoor air and then dried briefly in a tumble dryer when they are almost dry. This makes the bedding feel softer and less creased. Most of our products will not need to be ironed afterwards. Washed linen, in particular, is supposed to be slightly creased, which means there is no need for ironing. Although this is fine too, of course.

If you prefer to dry them in the tumble dryer, do this at a low temperature.

Lastly; always wash duvet covers, pillowcases and decorative pillow covers inside-out, then you will be able to enjoy them for a lot longer!
