

Cloudrock Waterproof

Terrain proof. Element proof. Excuse proof. Meet the Cloudrock Waterproof. The speed-hiking shoe built for traction, pace and protection in tough terrain – no matter the conditions. Born in the Swiss Alps for those that live for adventures outdoors, its specially engineered Speedboard propels you

to the summit before sunrise. The cushioning and hold of the Cloudtec® sole with a Missiongrip™ overlay then encourage you to extend your experience long after. For performance stride after mountain-top stride. The Cloudrock Waterproof. Stay out there.

RUNNER PROFILE
Outdoor adventurers looking to cover rough terrain quickly in all conditions.

UPPER
Breathable waterproof membrane lets air in while keeping the elements out.

High collar protects the ankle from rough ground and wild weather.

SPEEDBOARD
Engineered for uneven terrain. Supports stability as well as forward motion.

OUTSOLE
Missiongrip™ rubber overlay ensures grip and traction even in tough conditions.

Zero-Gravity Clouds provide cushioning and energy return for long-distance comfort.

Sand | Black

Wind and water out, air in. That's the basic premise behind the sophisticated upper of the Cloudrock Waterproof. The advanced membrane keeps feet warm and dry while still letting air circulate.

Meet running on clouds made mountain-proof. The outsole of the Cloudrock Waterproof reinforces Zero-Gravity Cloud elements with the trail-level toughness of Missiongrip™. Soft landings, rock-solid performance - whatever the terrain.

Inspired by the Cloudventure trail-running shoes, the Speedboard of the Cloudrock Waterproof balances forward propulsion with stable support. For a steady pace when the ground underfoot is uneven.

The Swiss-engineered hook lets you lace up for adventure however you like. Choose traditional lacing with a locking function or one-pull lacing to lock-in faster. The tongue elastic keeps the ends of the laces safely out of the way as you head for the peak.
