

# UV CLEANSER

## Product Description

Astonishing UV Cleanser is a specially formulated cleanser for the Astonishing UV/LED gel system. It removes dispersion layer from the Astonishing UV/LED gel systems following polymerization. Use Astonishing UV Cleanser to safely remove the dispersion layer following polymerization without dulling or streaking the finished surface.

## Features & Benefits

- Designed to remove uncured gel after curing
- Removes residual gel without streaking or dulling the shine
- Perfect for cleaning Gel Application Brushes. It will not damage brush or interfere with gel nail shine
- Sanitizes while it cleanses
- Used to remove gel that may have accidentally come onto contact with the skin

## Usage

Use with IBP Gel Sponges to prevent dulling of the gel shine. Lightly saturate a Gel Sponge with Astonishing UV Cleanser and gently wipe the top of the nail to remove tacky residue. For best results, use a fresh side of the Gel Sponge for each finger. Do not cleanse between each coat of gel.
