

LITTLE TROPHY

THE NETHERLANDS

*Luxury Handmade
Scarves and Accessories*

about | strange time

We live in a special time. When we got struck by the COVID-19 lockdown in the beginning of this year, we started our search for the most suitable fabrics for face masks. Just like our scarfs, the face masks had to comply with our PURE values. It has become a sustainable product that is fabricated without allergy inducing chemicals. With this new article we can offer you, as a loyal customer of Little Trophy, an accessory that matches your scarf. Each face mask is printed by making use of water-based ink, and it is manufactured by hand.

Besides face masks, we're launching our first unicoloured stoles made out of 100% merino wool. We went on a quest for the best weavers and the nicest and softest yarns. Of course these Items are made with love for craft and quality as well. Together with these stoles we offer matching face masks, with patterns inspired by England in the 19th century.

Obviously, we've designed some beautiful new silk scarfs as well, which can be knotted very nicely by using the new 'scarf jewel': a buckle that makes wearing your long or carré silk scarves even more versatile and enjoyable.

Take care of yourself and each other.

inspiration | glorious days

The golden glow of the setting sun at the end of the day makes me long for summer. After this season full of warmth, the days get shorter and the nights get cold. Ducks are being chased by hounds and the hares are pricking up their ears before running into the picturesque farmlands. The winter has set in. Although it's still pleasant to wear a dress by day, I prefer to put on a nice warm stole in the evening. A cosy moment in front of the fireplace with a hot cup of tea. For the new collection we chose for warmth and protection.

Have you also noticed that this desire is bigger than ever before? We're waiting for glorious days after these silent times. Therefore, we were seeking for soft wool in plain colours. Besides, we now offer a tartan pattern with hand-embroidered fringes. Finally, the luxurious prints on sensual silk are also featured on our cotton face masks. Safety first, since we now know that the things we cannot see can be harmful for our health.

We're looking forward to the glorious days after the storm...
