BULAGGI

the Bag

Between traditional and contemporary, BULAGGI Spring/Summer 2021

Launching their 2021 summer collection, BULAGGI proves that fashion, functionality & the environment are important to the brand. With its 100% vegan 2021 summer collection, BULAGGI introduces also a new, **eco-friendly material**.

The collection consists of 2 lines- Reflect & Bloom, which connects to the dilemma we are encountering in the trends for summer 2021. Neutral colours and sleek styles mirror our search for tranquillity, for example the **Kayla** group on Page 28; on the other hand, we are also seeing many casual styles featuring an almost provocative amount of intense colour, for example the **Zebraflower** group on page 3. Influences from nature are key in both these contrasting trends, as is the use of a variety of traditional crafts in a new guise, for example group **Block** on page 8.

BULAGGI is aware of the increasing pressure on both people and the environment, and of how this has led to a greater demand for more environmentally-friendly materials. Starting with the SS21 collection, BULAGGI is proud to present part of its collection in an **eco-friendly, vegan material**. This material is water-based and **solvent-free**. The 3 elegant & feminine groups in neutral colours can be found on page 29-31 and are marked with the green 'eco-friendly' logo.

"Energy consumption and waste from by-products have been reduced significantly as compared to the traditional production process for synthetic leather. Thanks to these savings in energy and the avoidance of solvents, the production of the bags is a low-carbon process. This contributes to the steps needed to protect our environment, not least because another benefit of this process is a huge saving on water compared to traditional production method".

Annemarieke Schouten-Walraven, owner and designer at BULAGGI.

BULAGGI is proud to present **eco-friendly bags** in this new SS21 collection. The material of these bags are water-based and **solvent-free**. The 3 elegant & feminine groups Gauze, Basalt & Acorn in neutral colours are marked with the green 'eco-friendly' logo in this catalogue.

"Energy consumption and waste from by-products have been reduced significantly as compared to the traditional production process for synthetic leather. Thanks to these savings in energy and the avoidance of solvents, the production of the bags is a low-carbon process. This contributes to the steps needed to protect our environment, not least because another benefit of this process is a huge saving on water (appr. 70%) compared to traditional production method".
