

TUBE WALL LAMP GU10 UP-DOWN

TUBE | TUBE WALL LAMP GU10

The TUBE collection

Are you looking for different luminaires that still look alike or belong together? Then the TUBE collection might be something for you. This collection consists of surface-mounted ceiling spots, 3-phase track spots, wall spots and pendant lamps. Due to the fine round design, these lamps are suitable for any interior. The luminaires can be used in living areas such as your kitchen, living room and bedroom, but can also be used perfectly in hotels, office spaces, schools and other public spaces. These lamps have a GU10 fitting so that you can connect the lamp with Philips HUE by using a Philips HUE compatible lamp.

The wall spots from the TUBE collection are available in the trend colors black, white and silver.
