

Recessed LED ceiling spot FLEXX tiltable round

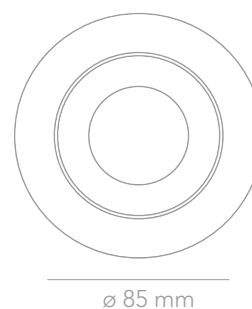

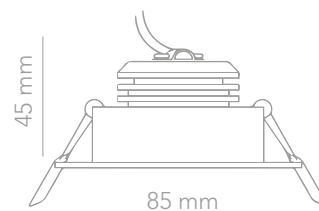

The FLEXX spot consists of a separate light module and interchangeable covers. The compact height makes the FLEXX spot specifically suitable for ceilings with limited vertical clearance and with its heights of just 45 mm and 55 mm for dim-to-warm, this spotlight fits in the tightest of spaces. FLEXX is suitable for residential applications in areas as living rooms, kitchens, hallways, bedrooms etc. but also in public spaces such as hotels, restaurants, shops, showrooms and offices.
