Preface

There is nothing quite like working on an idea for something homemade and then giving that little something as a present to someone you love. You can use the instructions here to crochet the same project or you can use it as a source of inspiration for your own ideas. A self-crocheted article is absolutely unique and therefore very special.

Have fun crocheting!

If you choose to work with a thicker hook, crochet one or two round less leaving out round 9 and/or 10. The crochet work for the lid should come up a little smaller so that it fits better. Crochet the three rounds (without increases or decreases) for the side edges. In the last round, decrease equally approx. 6 dc.

General tips

When decreasing double crochet stitches (= dc2tog):

Always insert the hook in the front loop of the previous round so the decrease is not so noticeable.

Fastening off:

At the end of the last round do not cut the yarn too short and draw it through the last stitch. Use and fasten off the yarn later to connect the parts.

There are three ways to close a round:

- Close a round with a sl st and begin the next rnd with 1 ch.
- Turn the work over at the end of a round and crochet back in the other direction.
- Mark the beginning of the round in a contrasting colour and continue crocheting in spirals.

Note: The closing method affects the total number of rounds. That's why it's always important to follow the instructions.

Important: If a sl st is crocheted in a rnd, this is counted just like other stitches. Exception: If a rnd is closed with a sl st, then this sl st is not counted as a stitch.
