1304	Spraying Gun	1
1311	Spray Nozzle of Gun	1

Interior Decorate Spraying Machine

1302	1303 + 1304 + 6 m hose
	1 Box

Used for internal facade coating or applying the face rite paint on plaster, concrete, gauging plaster, wooden Natural boards and prefabricated surfaces in interior decorations. Creates large and small grains on walls. Requires a set with a 6m hose and a 40 Lt storage tank, and 5 bar compressor connection. Size of the grains can be adjusted using the pressure and paint adjustment valves on the gun.

1306	Complete Set	1
1307	Spraying Gun	1
1308	Tank 2 lt	1

Exterior Surface Acrylic Spraying Gun

1306	1307 + 1308
	1 Box

Used in external decoration applications with paint gun with acrylic external mineral-sanded coating paints. The gun operating with 5-7 bar pressure requires a compressor connection. The gun creates large and small grains on walls. Grain size is adjusted using pressure adjustment screw at the backside of the gun.

EXTENSION POLES

It's length can be adjusted.

Wooden tip provides multi purpose usage.

COMPOSITE

FIXED POLES

It can also be used as a display stand for it's sale, with the apparatus which comes with it's box and with it's easy opening cap.

Due to the composite structure of plastic and sheet metal combined with a special technique, it is at least 30% more resistant to bending from similar size poles.

Because of its plastic coated surface, it is highly resistant to corrosion and it is long-lasting.

The universal end is compatible with many apparatuses.

With it's five different color options in it's box, it provides choice according to the taste of the customer.

It provides ease of purchase and sales with it's economical price.

Effect Series Application

MATERIALS REQUIRED

Paint and application for painting background.

Sponge and water for making wet the background.

Effect paint and roller to apply effect for second layer.

Sponge roller for removing the excess of paint.

The tool for the effect to be applied.

Effects may vary depending on the applied techniques and paint. Before application a good idea to create a test area to experiment.

1

Please apply lining paint and wait until it is dry. For not drying up effect paint, wet gently over the lining paint.

2

Apply the effect paint on the lining. Remove the excessive of paint by using sponge roller.

3

Before the effect paint dry using effect tool you can make figure by pressing the tool on the wall.

❗ For having clear figure use effect paint.

First and second layer of paint will appear final touch over your wall. Keep this in mind when choosing colors for each floor.

MIXER

HEADS

For use in application of materials like paints, plaster, mortar, filler, lacquers, etc. with drills or mixing machines.

SPREADERS

It is used to form flat and smooth surfaces on the areas of application by means of its flexible and silicon structure. It eliminates air bubbles.

Dekor General Product Stand includes 208 main products covering 1158 items in different sizes and models. The range consisting of 8 vertical boards 2 paned rod rails covers almost all Dekor products. Dealers having this exhibition range in their stores will support the sales in their region by enriching the product content. Moreover; product demands received from the regions in our company will be directed to the dealers having this range in their stores and they will also benefit. Exhibition range can be either used in whole or distributed in the store depending on the panel ranges. Prices of this exhibition range are determined depending on the list prices of the products it covers. Panels used to display products are free of charge.
