in one dose.
- ✓ **Unique practical results**  
for more than 15 years.
- ✓ **Safe and tested product**  
- highly successful.
- ✓ **Market leader**  
in its category.

## How ZooLac<sup>®</sup> PROPASTE<sup>®</sup> works

- 1 Stabilizes digestion**  
ZooLac<sup>®</sup> PROPASTE<sup>®</sup> stabilizes the digestion and balances the bacterial flora in the intestinal tract by working with the good bacteria and the animal's own immune system.
- 2 Balances intestinal flora**  
ZooLac<sup>®</sup> PROPASTE<sup>®</sup> promotes the good and naturally occurring bacteria with a well defined effect. The overall effect is therefore very broad and ensures a unique result in the animal.
- 3 Controls fluid loss - quick-acting**  
ZooLac<sup>®</sup> PROPASTE<sup>®</sup>'s unique composition works mainly by preventing harmful bacteria from attacking the intestinal wall, while the good bacteria attack the harmful ones. The competition is a naturally occurring action that limits the growth of harmful bacteria.
- 4 No resistance development**  
ZooLac<sup>®</sup> PROPASTE<sup>®</sup>'s action means harmful bacteria cannot develop any resistance, which is often the case with antibiotic treatments.

## Instructions

Administer **ZooLac<sup>®</sup> PROPASTE<sup>®</sup>** using the teuser-friendly dosing syringe which constitutes the product packaging. Prior to administration, set the syringe to the required amount, as per the dosing table. Place the correct amount of **ZooLac<sup>®</sup> PROPASTE<sup>®</sup>** on the animal's tongue or on top of its feed. The administration itself is easy, because animals tend to like the taste of **ZooLac<sup>®</sup> PROPASTE<sup>®</sup>**.

Store **ZooLac<sup>®</sup> PROPASTE<sup>®</sup>** at normal room temperature. If the product is stored in the fridge, then it must be brought to room temperature prior to administration.

## Natural product

**ZooLac<sup>®</sup> PROPASTE<sup>®</sup>** is a natural product and can not be overdosed.
