Pebble Hand Dryer

Combining Style with Performance

- High-performance
- Sleek & modern
- Hygienic
- Energy-efficient
- Quiet
- 5-year warranty

HIGH-PERFORMANCE

Strong motor

- Onyx relies on its own brushless motor technology, custom-designed for endurance and a unique performance
- With 15 years of experience in motor engineering for hand dryers, our motors show the lowest failure rate on the market

No more cold hands

- The Pebble comes with the option to heat the purified air, which is convenient in colder periods of the year or colder locations

SLEEK & MODERN

A joy to behold

- Unique pearl finish
- Stylish lighting design to indicate standby and drying mode
- Available in white, silver & black

HYGIENIC

Hepa filter

- Hygiene was top of mind when we designed the Onyx Pebble. The Pebble comes equipped with a HEPA filter, which is also used in professional antiviral face masks. The HEPA filter captures up to 99.97% of allergens, bacteria and pollutants. It is important that hands are dried with clean air. Unlike other dryers, the Pebble indicates when a filter needs to be replaced for easy maintenance and to guarantee the air is purified properly.

Anti-microbial IONPURE coating

- The Onyx Pebble is covered with an IONPURE coating, which prevents bacteria from surviving on the device. Moreover, this coating makes this hand dryer extremely durable and heat-resistant, and also protects it from discolouration.

onyx.

QUIET

Noise level limited to 68 dB

- Specifically built to produce powerful airflow yet less noise
- With a noise level of only 68 dB right in front of the device, the Onyx Pebble produces less sound than most high-performing hand dryers
- Perfect for quiet locations, including offices, restaurants, schools and hospitals

RELIABLE

5-year warranty

- Onyx products are built to last. For your peace of mind, we offer a 5-year warranty

Fast

- The Onyx Pebble delivers an exceptional performance per Watt, with a drying time of less than 12 seconds

Durable materials

- High-quality ABS increases the durability of the hand dryer
- The glossy UV-coating offers excellent anti-scratch properties and makes the surface extremely resistant to general wear and tear

onyx.

EASY TO INSTALL

Shared platform mounting bracket

- The mounting bracket allows for an easy upgrade to any new Onyx model
- No technician is required when installing a new hand dryer

Plug & Play

- Simple installation thanks to 'snap in/out' system
- No more 'on-site service costs'

GOOD FOR THE ENVIRONMENT AND YOUR WALLET

Energy-efficient

- As the Pebble only needs 300 Watts of power to run, CO₂ impact is reduced with 80% compared to most hand dryers and 90% compared to paper towel usage
- Onyx commits to using recyclable paper packaging materials instead of plastic materials

Exceptional performance per Watt

- Lower power consumption without compromising on performance
- The Onyx Pebble saves up to 90% in costs compared to other hand dryers
- Investing in a Pebble equals the cost of 6 to 8 months of paper towels, while its life expectancy is at least 7 years with standard maintenance

Motor

Type	Brushless motor Onyx
Voltage & Frequency	220~240, 50Hz / 110~120V, 60 Hz
Rated Power	300 Watt (Heater 400 Watt, opt.)
RPM	30,000
Air speed	96 m/s
Air volume	84 m³/h
Noise	≤ 67 dB
Life time	≤ 5000 H
Standby power	≤ 0.5 Watt (Blue Angel regulation)

Colour

Silver

White

Black

Safety & main materials

Motor thermal protection	Auto-resetting thermostat Turns unit off at 120°C
Timing protection	50 sec. auto shut-off
Internal lead wire	Temperature resistant min. 125°C
Drip proof	IPX3
Electrical isolation	Class II
Internal material	Fireproof 94VO
Cover material	ABS

General

Drying time	Under 12 sec.
Sensor type	Auto-infrared touch-free operation
Air filter	'Clean Air' filter, HEPA level
