

A unique patented parcel box lock.

Lock can be pre-set so that the door can be opened once without a key. Any subsequent attempts to open the door will require the key.

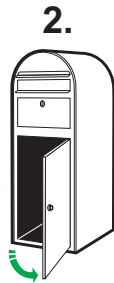

A locked parcel box can be pre-set for parcel delivery by turning the lock horizontally with the key.

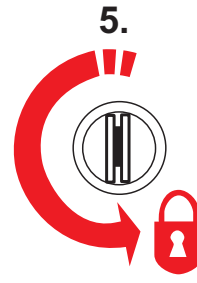

ok!

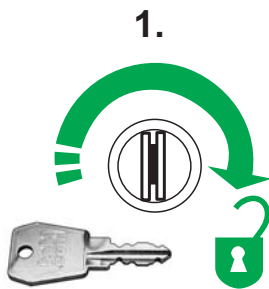

1. By turning the lock clockwise, the delivery person can open the pre-set lock without a key.

2-4. The door is opened, the package is placed inside and the door is closed.

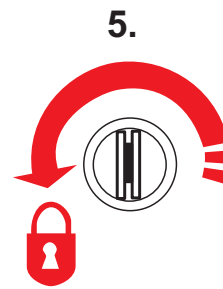

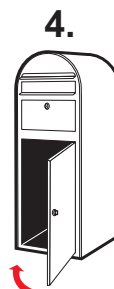

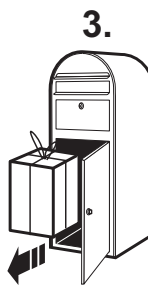

5. The door is locked by turning the lock counter clockwise.

1. A locked parcel box can only be opened with the key.

2-4. The door is opened, the package is removed and the door is closed.

5. The door is locked by turning the lock counter clockwise. To set the parcel box to receive another delivery, simply turn the lock horizontally with the key again.
