Filtered boiling water in an instant

PROFESSIONAL
RANGE FOR THE
WORKPLACE

100 years of Dutch quality

HotSpot Titanium is an independent company born out of Dutch innovation hub Inventum (who boast over 100 years of electrical innovation excellence in the design and manufacture of ventilation and boiling water systems and appliances). Inventum pioneered the use of Titanium for boiling water tanks because it is extremely durable, resistant to corrosion and, unlike other inferior materials, does not attract calcium limescale. What's more, Titanium does not pass its ions into your drinking water so corroded tank-material is therefore not consumed by the user.

Introduction to HotSpot Titanium – design and manufacturing excellence of Inventum Titanium is united with the very best tap styles to bring the very best filtered boiling water mixer tap to your place of work. With 100's of hot drink lovers already enjoying the benefits this beautiful, space saving, energy saving 3-in-1 hot, cold, filtered boiling water masterclass, please read on to find out more about what HotSpot Titanium can do for you and your business.

Let's talk business: ROI

Business Advice UK (2017) shared that „the average British worker spends 109.6 hours per year making tea and other hot drinks“.

Reduce the financial strain on your business with the HotSpot Titanium, support the health of your employees by providing filtered boiling water for great tasting hot drinks in an instant.

Use less power and water than your traditional kettle, HotSpot Titanium boiling only boils the water that is to be used and with the high-density vacuum packed insulation has minimal standing heat losses.

Thanks to its Titanium tank and simplicity in design/ functionality, HotSpot Titanium needs little maintenance; costing less in time and money.

Save time

Use less time, electricity and water with HotSpot Titanium instant boiling water solution versus your traditional kettle. Our 2 heater sizes are designed to handle varying levels of demands in the workplace. What's more, they improve employee productivity by reducing the time wasted waiting for the kettle to boil.

Environment

Only boil the water that is to be used and with the high-density vacuum-packed insulation enjoy only the minimum of heat loss. Add Cold Water Filter to play your part in reducing plastic bottle waste..

Save space

Only HotSpot Titanium eliminates the necessity to use up valuable counter space while at the same time being commercially capable. This robust and durable filtered boiling water appliance fits into any kitchen cabinet, with zero exposed power leads, no cabinet cutting and no cutting of counter-top; thus offering less clutter.

Titanium

Why Titanium? It's strong, highly resistant to corrosion and, unlike other inferior materials, resists the build-up of calcium limescale. What's more, titanium never passes its properties onto the drinking water as it is a very low-level contamination material. The vessel, element, inlet, outlet and temperature sensor-covers are all made from titanium. We are the very first instant boiling water appliance with a water containment made completely from high-grade titanium, with 20-year 'no leak' warranty on the tank for absolute peace of mind..

Tap range

100°C Smooth Flow

At HotSpot Titanium we know that the workplace has tea-drinkers that will not accept the water temperature from vented¹⁾ boiling water taps. HotSpot Titanium features unvented²⁾ water heating technology – this enables boiling water to be stored without turning to steam. Only HotSpot Titanium achieves true boiling in the smoothest of flows.

Want sub 100°C stored water, we can do this too, try our WRAS approved range.

Safety first

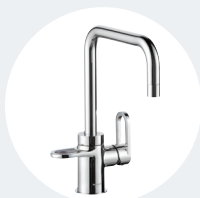

All HotSpot Titanium water appliances are safe and easy to use. Choose between our patented Intelliprotect^{®3)} with Adrianna and Alessio or Spring-back-safety⁴⁾ with Calisto and Vitoria.

1) vented – the stored water is open to atmospheric pressure and cannot, boil without evaporating to the atmosphere

2) unvented – the stored water is closed to atmospheric pressure and can boil thus delivering at a satisfactory temperature for workplace kettle lovers!

3) Intelliprotect[®] offers 3 safety setting and Pan-fill option

4) Spring-back-safety enables the user to regulate flow

Heater range & accessories

Hot-Mix Water

Did you know that our 8litre heater can provide your hot water adjustable 35°C to 70°C as well as your boiling water. Depending on volume required, no need for additional water heaters, no long pipe runs to distant hot water tanks.

Standard accessories included:

- Water filter: boiling water
- Installation kit

Non standard accessories:

- Water filter: cold water
- Water flow meter
- Boiling water extension hose (50 or 100 cm)

HotSpot Titanium – Cold Water Filter

- Instant, top-quality, particle-free water
- Reliable elimination of “off-flavour” elements
- Large filtration capacity of 10,000 litres
- Reduction in heavy metal content
- Activated carbon with antibacterial properties
- Particle filtration [µm] > 5
- Total height without bracket (A) in mm > 280
- Total height with bracket (B) in mm > 300

HotSpot Titanium – Boiling Water Filter

- PREMIUM taste
- Reliable limescale protection
- Balanced mineral content thanks to Mg2+
- 5-stage filtration for maximum effectiveness
- Total height without bracket (A) in mm > 420 mm
- Total height with bracket (B) in mm > 445 mm

Easy as turning a tap

Easy to install

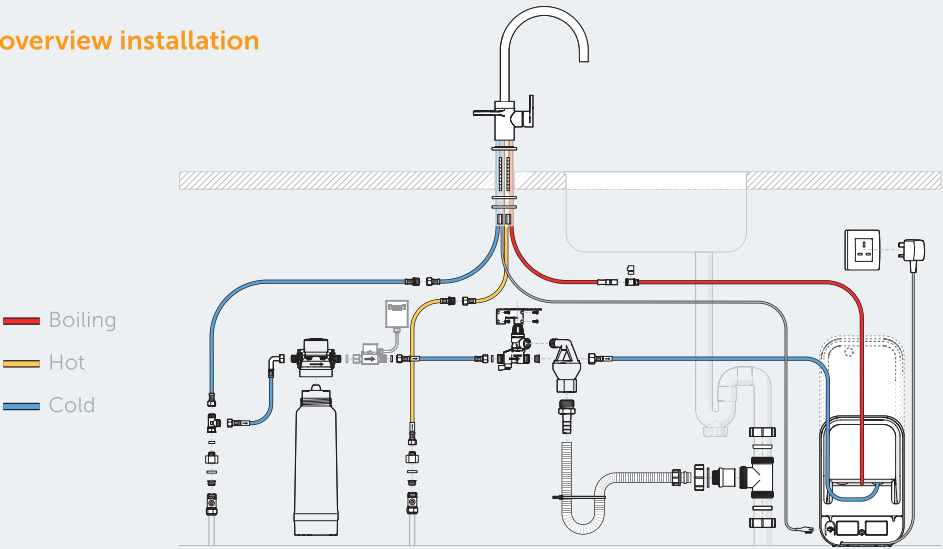

All that is needed is regular 15mm incoming potable water supply, suitable waste, 13amp power-socket, smallest of kitchen cabinets, standard sink & sink-mixer hole. We can install for you or train your installer – you choose.

Effortless filtration

HotSpot Titanium localised filters are super easy to change, taking as little as 10 seconds! Unlike other filtration systems, there is no need for initial flushing. All HotSpot Titanium professional systems come with a Filter Set as standard.

Warranty

HotSpot Titanium products are designed and built with great care. As a leading filtered boiling water provider we offer free repair of all material or structural defects within its warranty period.

Our warranty period is calculated from the date of purchase:

2-year parts & labour standard warranty on product

5-year parts & labour warranty for the registered owner – when registered within 3 months from the date purchase

20-years leakage warranty for the registered owner on corrosion of the titanium tank – when registered within 3 months from the date purchase

Register your purchase at:

www.hotspot-titanium.co.uk/register-your-hotspot-titanium/

What is covered under your HotSpot Titanium warranty

We warrant HotSpot Titanium product against failure due to design, manufacture and/or assembly. For further details please see our full warranty statement at www.hotspot-titanium.co.uk/service/warranty

Be supported

We offer expert support from order, installation and beyond. Working with trusted partners to service and support your HotSpot Titanium water appliance, ensuring that the best tasting water transports through the tap into your cup, mug or flask.
