**hotspot** titanium

# 100 years of Dutch heritage

**HotSpot Titanium as an independent company was born out of a Dutch innovation hub: Inventum.**

Founded in 1908 by Alexander Vosmaer, Inventum used the specifics of electric energy to create a range of innovative ventilation and boiling water appliances.

Energy Innovation First: safe and trusted. This promise has remained for more than 100 years. A promise that started with innovation and enthusiasm of people to do things differently and better and has evolved into producing new products and creating new brands such as HotSpot Titanium.

Thanks to Inventum's rich history, innovation and expertise in delivering sustainable, energy-saving hot water and ventilation solutions to the environment, HotSpot Titanium was spun off as a sustainable and lean manufacturing company that guarantees quality from start to finish with its filtered boiling water solutions.

At HotSpot Titanium, we believe the kitchen is a central point of the home and workplace. A place to connect and collaborate, to have exciting conversations and share experiences. A place where you eat and drink together. Where you create ideas and make memories.

We know that our customers want tapware that reflects their personal style. That's why we have exclusive design taps in our product range of various styles and finishes to suit any taste. We also know that they want a filtered boiling water solution that stands the test of time and isn't impactful on the environment!

Our 3-in-1 filtered boiling water tap switches easily between cold, hot and boiling water. Combined with our 4-litre or 8-litre water titanium boiler, HotSpot can support family homes and commercial spaces alike.

We chose to use titanium for our boiling water tank because it's durable, extremely resistant to corrosion and, unlike other inferior materials, has no build-up of calcium lime scale in the tank. What's more, titanium never passes its ions onto the drinking water which makes it 100% non-allergic and guarantees a pure taste. As a proof of our trust, we offer you a 20-year warranty on our tanks!

When choosing a filtered boiling water appliance for your residential or professional space, it is paramount to ensure the product of your choice delivers the best results and the purest filtered drinking water; as well as a luxurious design that matches your taste and your kitchen interior. With HotSpot Titanium, you get it all.

# Achieve an optimal ROI with your HotSpot Titanium

**A boiling water tap that ensures optimum efficiency?**

Yes, with our filtered boiling water tap you save on your energy bill, your valuable time and space on the kitchen counter.

## Efficient and sustainable

HotSpot Titanium boiling water taps use less power and only boil the water to be used, unlike a traditional kettle. HotSpot Titanium has a heater full of instant boiling water and has minimal heat loss due to the very good insulation.

## Save Time

You no longer have to wait for the kettle to boil so you can save on your precious time, electricity and water with HotSpot Titanium as a solution for filtered instant boiling water. Our heaters with various capacities are designed to meet your needs in the office and at home.

## Save space

The robust and durable boiling water tap takes up little space on the countertop. In addition, our water heaters are compact in size, which makes them easy to fit in a kitchen cupboard. Installation does not require cutting into the cupboard or the countertop; so that also means less clutter.

## Titanium

Titanium is one of the strongest materials and very resistant to corrosion and the build-up of limescale. Moreover, titanium never passes on its properties to the drinking water, so there is no aftertaste. We are the very first boiling water company where the water reservoir is completely made of high-quality titanium. For absolute peace of mind, we provide a 20-year warranty on the titanium tank.

# Boiling water with a smooth flow

HotSpot Titanium delivers filtered boiling water without spluttering by using a unique smooth flow technique. You no longer have to wait for the water to boil. With HotSpot Titanium you can easily and quickly fill a tea glass or a large pan with 100°C boiling water. You immediately get the right amount of water, so you waste less water.

## A robust and reliable design

The design of HotSpot Titanium is not only beautiful, but it is also designed to last. We have a wide range in different styles and finishes so that there is a suitable filtered boiling water tap for everyone. HotSpot Titanium gives a boost to every kitchen design!

## Safety above all

HotSpot Titanium combines luxury, convenience and sustainability in the kitchen. The 3-in-1 tap easily switches between cold, warm and boiling water. All our taps are equipped with safety systems so that children or people who have not used the tap before cannot unintentionally tap the boiling water from the tap. You can choose from electronic taps with our patented IntelliProtect® system or mechanical taps with our spring-back-safety.

# Our full product range

The kitchen is the heart of the home and office, where the meals that unite us are prepared. It is a place that allows connection and thus the creation of precious memories. How do you choose the right colour or finish to embrace this experience?

# Adrianna-series

**Adrianna**  
Polished Chrome

**Adrianna**  
Stainless Steel Effect

**Adrianna**  
Matt Black

The Adrianna is an electronic 3-in-1 filtered boiling water tap, available in three different finishes. The Adrianna series has a square U-spout and a sleek Italian design. This beautiful series can be supplied with a 4 or 8 litre boiling water heater. Regular hot and cold water is connected to the existing pipes. Because the heater is very compact, it can be placed in almost any kitchen. With the Adrianna, safety comes first with a unique and patented safety system: IntelliProtect®, with which children cannot simply activate the boiling water function. The tap is also equipped with an insulated spout so that it stays nice and cool during use.

In addition, the tap is equipped with a unique smooth flow technique, which ensures that boiling water never comes out of the tap already spluttering.

**Connection:** Hot and cold water is connected to the existing pipes.

**Swivel Range:** 180°

**Tap hole:** Ø 35 mm

**Child safety system:** IntelliProtect® and Smooth flow technique

# Alessio-series

**Alessio**

**Tap hole:** Ø 35 mm

**Child safety system:** Spring-back-safety

# Why a titanium heater?

Our 4 litre and 8 litre water heaters feature a pure titanium water storage tank which ensures that there is no aftertaste. In addition, a high-quality vacuum insulation panel around the tank keeps the temperature at the right level (above 100°C), guaranteeing negligible standby loss.

## Do you choose an 8 litre or a 4 litre heater?

A 4 litre heater is suitable for an average household. The 8 litre heater with built-in combi facility provides twice as much boiling water. The 8 litre titanium heater delivers a maximum of 27 litres of boiling water per hour, which is comparable to 140 cups of tea.

## Hot-mix: instant hot water

Did you know that our 8 litre heater can supply both hot water (adjustable from 35 - 70 degrees) and boiling water. Depending on the volume required, no additional heaters or long pipes to external hot water supplies are required.

4 Litre

8 Litre

Min. bar pressure	1 bar	1 bar
Immediate draw off - 167 ML	20	40
Cups per hour - 167 ML	120	140

250 ml  
Scented with  
Verbena, Lemongrass,  
and Citrus

# Easy to install in 4 steps

**A HotSpot Titanium system can be installed in an existing or new kitchen.**

Only four basic conditions need to be present in the kitchen cupboard.

**These are:**

1. Mains cold water with isolation valve
2. 13amp electrical socket
3. Space (see heater dimensions)
4. Waste connection

Installing a boiling water tap is relatively easy, especially for someone who is a bit handy and likes to do odd jobs. If that's not for you, you can always use our installation service.

## Schematic representation of the installation

# Warranty

Our products are made with the greatest care. An eye for design, quality and sustainability. As a leading company in the industry, we guarantee excellent warranty conditions on all material or structural defects within the warranty period.

**Our warranty periods are as follows:**

**2-year standard warranty**

**5-year warranty on registered products**

**20-year leakage warranty on the titanium tank for registered products**

**Register your purchase via:**

[www.hotspot-titanium.co.uk/register-your-hotspot-titanium/](http://www.hotspot-titanium.co.uk/register-your-hotspot-titanium/)

## **What is covered by your warranty**

The warranty only applies if there are material and/or structural defects and if the defect is not the result of boiling dry, inadequate filtration of too hard or too aggressive drinking water or aggressive liquids. For more information, you can consult our full warranty conditions at <https://www.hotspot-titanium.co.uk/service/warranty/>

## **Your support**

We offer you support in every area; from your order, to installation and far beyond. We rely on our products, our employees and our partners to provide you with the best possible service and support for your HotSpot Titanium. Through all this we ensure that you get the best quality water in your glass or cup!

# Summary

Do you want to save valuable time, electricity and water? HotSpot Titanium offers the solution. You no longer have to wait for the water to boil. With HotSpot Titanium you can easily and quickly fill a tea glass or a large pan with 100°C filtered boiling water. You immediately get the right amount of water, so you waste less water.

## A suitable boiling water tap for everyone

Our heaters with various capacities are designed to meet different requirements for use in the office as well as at home. HotSpot Titanium combines luxury, convenience and durability in the kitchen. The 3-in-1 tap easily switches between cold, warm and boiling water. The filtered boiling water taps are available in various designs and finishes, so that there is a suitable filtered boiling water tap for every interior style.

## Safety first

The filtered boiling water that comes out of a HotSpot Titanium has a smooth flow and does not splutter. So extra safe! All our taps are equipped with safety systems so that children

or people who have not used the tap before cannot unintentionally tap the boiling water from the tap. You can choose from electronic taps with our patented IntelliProtect® system or mechanical taps with our spring-back-safety.

## Titanium

Why titanium? It is strong, highly resistant to corrosion and unlike other materials, resistant to scale build-up. Moreover, titanium never passes on its properties to the drinking water, so there is no aftertaste. The barrel lid, element, inlet, outlet and temperature sensor are all encased with titanium. We are the first-ever filtered boiling water company to have the water tank made entirely from high-quality titanium, with a 20-year leak-free tank warranty for absolute peace of mind.
