/ IN YOUR CAR

1 Clean the windshield and choose a position where the Dashcam will not block the driver's view. A recommended place is behind the rear view mirror. Place windshield sticker.
Tip: Put the hexagon mouth of sticker upside-down.

2 Insert a Memory Card (SDHC Class 10 or above) into the Dashcam.
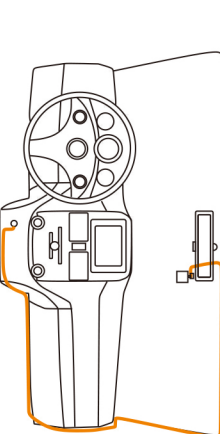

3 Mount the Dashcam onto the Bracket.

4 Fix the Bracket to the Windshield Sticker.

5 Fit the USB Cable to the Bracket and fix Cable in car. (The cable can be hidden and fixed with cable clips if desired).

6 Plug in the Power Adapter to the car's cigar lighter.

7 Insert USB Cable into Power Adapter.

8 Your Xplore C1+ is ready to go.

/ TURN ON AND OFF
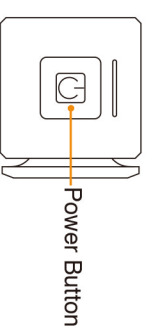

Power Button

AUTOMATIC
Xplore C1+ Dashcam starts recording when the engine starts, and powers off 20 seconds after the engine stops.

MANUAL OVERRIDE
Turn ON: Hold the Power Button for 2 seconds.
Turn OFF: Hold the Power Button again for 3 seconds.

SNAPSHOT MODE
When recording, press the Power Button. **Xplore C1+** takes a picture and saves a 12 second video clip.

/ Xplore C1+ APP

Go to our website at www.amacam.com to download the App, or search for xplorecam on the AppStore or Google Play.

/ WIFI CONNECTION

Switch on your smartphone's WiFi. Search for SSID 'XPLORE_xxxxxx' to connect. The initial password is 12345678.

/ FAQs

1 Dashcam won't record
Make sure you are using a SdHC rapid storage card (Class 10 or above) from an authorized seller. Check if there's enough space on the memory card. Format the card if necessary.

2 Dashcam is hot
Heating is normal, and the normal operating temperature is between -20°C and 70 °C.

3 Dashcam has crashed
Use a paperclip to press the Reset Button.

4 What's the maximum capacity of memory card?
When can a memory card be inserted or removed?
32 GB. Insert and remove the memory card when Dashcam is turned off.

5 What's seamless loop recording?
When the memory card is full the Dashcam will automatically overwrite from the earliest recording. Protected files and emergency recording will not be overwritten.
