

CONSTIX™ Swab, SP-8

Double layer sealed knit polyester

Description

CONSTIX SP-8 sealed polyester swab consists of 100% knit polyester fabric that's thermally bonded to a polypropylene handle with a large paddle. The cleanroom laundered, double layer knit polyester head provides enhanced sorbency, particle entrapment and removal. The polyester head is constructed without adhesives or binders, which makes the swab compatible with most common solvents, such as alcohols and ketones. The large paddle of SP-8 provides broader surface coverage in critical clean applications. The swab is durable, absorbent and features extremely low particles and residue levels.

Technical Data

Swab head material	Knit polyester
Swab handle material	Polypropylene
Construction	Thermally sealed and attached

Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
