

### Nitrile gloves 240 mm - white

#### About

Nitrile Gloves are latex-free, powder-free and resistant to a range of chemicals\*. The ambidextrous, white 240 mm (9") long cleanroom gloves are antistatic, flexible and comfortable offering the wearer good dexterity for prolonged use.

### Specifications

COMPATIBILITY: ISO Class 5 LENGTH: 240mm (9")

MATERIAL: Nitrile

PROTEIN LEVEL: Nitrile contains no natural latex proteins

SURFACE: Finger-textured

SHAPE: Ambidextrous

COLOUR: White

#### **Features**

- Resistant to a range of chemicals\*
- Antistatic
- Latex & powder-free
- Comfortable

#### **Meeting international standaards**

- ISO 2859
- EN455: part 1-4
- EN374: part 1-3
- EN420
- EN455
- ASTM D6319

FLEXIBLE & COMFORTABLE

**CHEMICAL RESISTANT\*** 

ANTISTATIC

# Nitrile gloves 240 mm - white

•	Product Name:	Clean Roon				•	Brand:	CQG Nitrile ® Or OEM Brand
		White Nitri 9"(240mm		s, r Textured.		•	Shelf Life:	Four (4) years from date of manufacture
•	Manufacture:	Made and	packed i	in Malaysia		•	Colour:	White
•	Surface:	Finger Text	tured			•	Design:	Ambidextrous, Beaded cuff
•	Length:	9 inches (2	40mm)			•	Thickness:	6mils( ±1)
•	Tensile Strength:	min 18 mp	a			•	Physical:	AQL 1.5 tor Major / AQL 2.5 for Minor
•	Packaging:			ble Poly Bag	8			(ASTM D6319)
				poly liner/ @1000 pices		•	Storage Instructions:	Store in a cool dry place (5"C-30'C) away from direct sunlight and
•	Material:	100% Nitril	e Butad	iene Rubber				heat
•	Quality Systems:	Industry St	d. Clean	facility holdi room Plant 5/ISO 13485:20		•	Traceability:	Individual bags of 1OOpcs/Bag marked with traceability numbers
•	Sampling:	MIL STD -	105E		•	•	Liquid Particle Counts: (as determined	<1600 particle counts
•	Non-Volatile Residue:	<30.0 µg/cm <sup>2</sup>	2				by IEST-RP-CC005.4)	cumulative at 0.5micron
•	Organics:	No Silicone by FTIR Spe	•			•	Dimension Criteria:	Size Palm/Width X-Small (75+5mm)
•	Inspection:	In accordar	nce with	ISO 2859				<u>Small (85+5mm)</u> <u>Medium (95+5mm)</u>
•	lonic Burden: (µg/cm²) (as determined by IEST-RP-CC005.4)	Fluoride Chloride Bromide Nitrate Phosphate	<0. <1.500 <0.050 <1.500 <0.800	<b>S</b> u Sollium Potassium Lithium Magnesium	<0.800 <0.050 <0.050 <0.0004 <0.004	ı		Large (105+5mm) X-Large (115_±5mm Length: 240 ±10mm Single Wall thickness (x0.01mm) Finger thickness : 0.16±0.03mm Palm thickness : 0.12±0.03mm
•	Meeting Internatio	nal Standaro	ii) EN4	455: Part 1-4 374: Part 1-3 420				Cuff thickness : 0.09±0.03mm

Section IV: Quality Assu	urance Conformity
Conformity:	The Nitrile Powder Free, C10 Gloves are produced conforming to FDA's 1000ml Watertight Test. ASTM D5151 and ASTM D3578 and conforms to customer specified standard accordingly.
Section V: Fire and Exp	olosion Hazard Data
Flashpoint	N/A
Autoignition Temperature	N/A
Flammable Limits	N/A
Extinguishing Media	Water, Carbondioxide, Chemical Foam, Dry Powder and Fire Extinguishing media may be used.
Fire fighting procedures and Personal P	Use of standard procedure for combustionrotectionmaterial fires including approvedself contained breathing apparatus.
Fire and Explosion Hazards	No fire of explosion hazards are associated with these products. They will melt at relavent temperature.
Section VI: Health Haza	rds Data
	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.
Bio-Compatibility:	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.
Bio-Compatibility: Section VII: Reactivity D	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.
Bio-Compatibility: Section VII: Reactivity D Stability	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.
Bio-Compatibility:  Section VII: Reactivity D  Stability Condition To Avoid	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply
Bio-Compatibility:  Section VII: Reactivity D  Stability Condition To Avoid Incompatibility	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply         Gloves easily contaminated while in contact
Bio-Compatibility:	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply
Bio-Compatibility:  Section VII: Reactivity D  Stability Condition To Avoid Incompatibility (Material to Avoid) Hazardous Decomposition	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply         Gloves easily contaminated while in contact with copper content material
Bio-Compatibility: Section VII: Reactivity D Stability Condition To Avoid Incompatibility (Material to Avoid) Hazardous Decomposition Products Hazardous Polymerization	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply         Gloves easily contaminated while in contact with copper content material         In a fire, these product may produce a black smoke
Bio-Compatibility:  Section VII: Reactivity D  Stability Condition To Avoid Incompatibility (Material to Avoid) Hazardous Decomposition Products Hazardous Polymerization  Section VIII: Spill, Leak a	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply         Gloves easily contaminated while in contact with copper content material         In a fire, these product may produce a black smoke         Will not occur
Bio-Compatibility: Section VII: Reactivity D Stability Condition To Avoid Incompatibility (Material to Avoid) Hazardous Decomposition Products Hazardous Polymerization	The chemical formulation of the gloves and surface lubricating materials do not contain any substances normally known to be harmful to the user or to any person with whom the gloves comes in contact.         ata         Stable         Does not apply         Gloves easily contaminated while in contact with copper content material         In a fire, these product may produce a black smoke         Will not occur
