

CLEANROOM STICKY ROLLER 10 cm (4 inch) white

DESCRIPTION:

The sticky rollers are designed for effective surface cleaning of walls, floors, equipment and work surfaces in controlled environments. These rollers are made of multiple layers of perforated polyethylene coated with acid free (pH 7) water-based acrylic adhesive rolled on a plastic core.

FEATURES:

- ♦ Strong, non-toxic adhesive coating
- ♦ Uniform adhesive for each layer
- ♦ Standardized and customized sizes and colors
- ♦ Suitable for both cleanroom and general applications

APPLICATION:

- ♦ Walls and ceilings of cleanroom facilities
- ♦ Laboratories
- ♦ Widely used in variety of industries including microelectronics, semiconductor, biotechnology, pharmaceutical and construction

TECHNICAL DATA

Attribute	Typical Values
Film Thickness	
Disposable Sheet	0.04mm
Adhesive Strength	
Back of each disposable sheet	450g/25mm
Elongation	
Horizontal	>150%
Vertical	>200%

- ♦ Color available in: White
- ♦ Available Width: 4", 6", 8"
- ♦ Length: 18m
