

## ST 700 VINYL WEATHERING TESTS

To reassure customers and to substantiate our claims for the endurance and performance of Rebo Industrial vinyl in outdoor conditions – our ST 700 series vinyl tape has been scientifically ‘weathered’.

Weathering test performed in accordance with ISO 4892-2

Weathering test performed in an Atlas Suntest XLS+ with a Xenon Arc source.

Test duration: 4,200 hours = equivalent to 10 years outdoor exposure in a typical central European climate.

This test covers the performance of the adhesive, the face material and the ribbon image.
