* Colour pre-prints on request

SMS TAG-ID2

The SMS TAG-ID2 is designed to give immediate improvements to your Lock-Out/ Tag-Out programmes; producing 'customised', colour coded tags that clearly identify specific risks and give you the capability to customise your Tags to be more effective, more flexible and convey a stronger safety message.

The SMS TAG-ID2 in combination with our tag materials offers you the following advantages:

- ✓ "Track" your products even faster
- ✓ Manage your stock more easily
- ✓ Use colour coding to determine status at a glance

Creating tags that carry the benefit of colour coding and carry more detailed information on the nature of the risk, adds greater clarity to the important message a tag is designed to give.

Printed information is legible and easier to read - avoiding mistakes and issues with poor hand writing.

Pre-punched Tags on a roll

Available in a large range of colours, including Hi-Vis and Glow in the dark, plus a range of popular sizes. Perfect for fast, customised tag production for all applications and environments including: LockOut tags, Kan Ban tags, Equipment tags, Retail tags, Material tags.

T300: Durable, waterproof, UV stable - for everyday Tag uses.

TT300: Extra tough - for harsh environments and extra aggressive handling.

Sizes: 50x100mm | 76x100mm | 76x154mm | 100x154mm

Continuous Tags on a roll

The same highly durable tag materials in the same range of colours, supplied as a continuous roll.

Tag lengths can be produced in any length and volume - manual cutting is required unless the optional cutter unit is added.

Size: 100mm (width)

Colours: White | Yellow | Red | Green | Blue | Fluorescent | ReGLO

REBO EXCLUSIVE!

ReGLO Tags

The newest in our range of Tag materials are the exclusive ReGLO tags. Increases safety by making your tags glow in the dark!

Perfect for identifying important items and objects that need to remain visible during a power outage or evacuation.

Sizes: 50x100mm | 76x100mm | 76x154mm | 100x154mm

Colour: ReGLO (glow-in-the-dark)

What other materials are available for the SMS TAG-ID2?

Shrink Tubes (ES100)

Shrink tubing for cable and wire marking - high quality 3:1 in a range of sizes and colours Heat will make these shrinkable tubes fit perfectly around your cables or wires.

Sizes: 19 x 4,6mm | 25 x 6mm | 38 x 8,5mm | 38 x 11,1mm

Colours: White | Yellow

Wire-wraps (WI100)

Self-laminating, wrap around cable and wire marking designed to give texts extra protection from chemicals and abrasion.

Sizes: 12,5 x 19mm | 25 x 37mm | 25 x 63mm

Colours: White header | Yellow header

Cable Tags (EC100)

High quality cable and hose tags, in various sizes and colours, simply fix with cable ties. Halogen-free and flame retardant.

Sizes: 60 x 12mm | 75 x 15mm | 75 x 25mm

Colours: White | Yellow

ResoLabels (RL100)

Create your own Raised Profile Labels - and replace your engraved plates at a lower cost and far faster production speed.

Sizes: 60 x 30mm | 90 x 45mm | 100 x 30mm | 100 x 50mm

Colours: White | Silver

Polyester labels (PV500, PT300, PT500, PT700)

Aluminium polyester labels for permanent identification of products, machines and tools. Tamper-proof (VOID) material is also available.

Sizes: Available in various sizes. Ask about the possibilities!

Colours: Matte Aluminum | Semi Glossy Aluminum | Glossy Aluminum

GHS Labels

Pre-printed GHS labels in various sizes, with a choice of up to 4 red diamonds.

SMS TAG-ID2 - Durable tags and labels from a durable work horse

Tags come pre-formed, hole punched and perforated, ready to use, or on a continuous roll – giving both speed of creation, convenience, cost control and total flexibility.

Plus: The SMS TAG-ID2 will also print die-cuts, raised profile labelling, shrink tube cable marking, cable tagging and self-laminating cable wraps.

Designed to be cost effective and at an extremely affordable price, the SMS TAG-ID2 comes ready to be effective and includes NiceLabel Express – a professional software that is designed for the purpose of label and tag creation.

The SMS TAG-ID2 is an entry level system that can be upgraded and evolves as demand increases or new technical labelling needs increase.

The SMS TAG-ID2 can be upgraded with a powerful cutter and the NiceLabel can also be upgraded to add greater functionality - as you gain greater use from your SMS TAG-ID2 system and realise how many label and identification challenges can be met by this in-house work horse.
