CAS500 – LOW WATER

CAS500 – OVERFLOW DETECTION

CAS500 – TEST MODE

IMPORTANT:

Test Mode has been integrated into this product to improve end-of-line testing during production and can be used by service Engineers to isolate components for individual function testing. Test mode should be conducted by trained personnel only. The icons on the On Board Control buttons do not match the commands they are associated with, when in test mode.

CAS500 – TEST MODE ... continued

CAS500 – TEST MODE ... continued

CAS500 – TEST MODE ... continued

CAS500 – TEST MODE ... continued

Note: When in Test Mode, the CAS500 will revert to standby mode if there are no buttons pressed after a period of 16 seconds. Any parts that may have been switched on during testing will also switch off.

CAS500 – REMOVING FUELBED

CAS1000 – CONTROLS IDENTIFICATION

The CAS1000 has two sides;

- Master Side: which commands the overall operation of the product
- Slave Side: which follows the operation commands from the Master side
- Both sides have independent Flame Effect and Sound controls

CAS1000 ON BOARD CONTROLS

- The Bluetooth Receiver is connected to the Master side via a jack. See page 19 and 20.
- The On Board Controls are different for either side.
 - The Master side has the seven buttons as seen in CAS500 product.
 - The Slave side also has seven buttons; however, the first two buttons contain no icons, and these should only be during test mode by trained personnel. For more details, see from page 29.

On board controls (Master Side)

On board controls (Slave Side)

CAS1000 BLUETOOTH RECEIVER

The CAS1000 bluetooth receiver contains six buttons, in contrast to the four button receiver used in the CAS500. The additional two buttons control the flame effect on the slave side of the product. See pages 19 and 20 for more details.

CAS1000 REMOTE CONTROL

The CAS1000 Remote Control also contains six buttons. Similar to the CAS1000 Bluetooth Receiver, the additional two buttons control the flame effect on the slave side of the product. See pages 22 and 23 for more details.

CAS1000 – STARTUP

CONNECT BLUETOOTH RECEIVER

IMPORTANT:
Product **will not**
function correctly
without Bluetooth
Receiver connected
