

RAM-PRO

tube cleaning system

The Goodway RAM-PRO tube cleaning system utilizes high-speed rotating brushes and a light, low-pressure water flush to remove soft to medium deposits in straight heat exchanger tubes. The RAM-PRO is a compact, electrically powered system which is easy-to-use and designed for engineers and contractors. Combine with Goodway flexible shafts and brushes for the best cleaning results.

Use the RAM-PRO for tube inner diameters between 7-28 mm.

Tube cleaning applications

Absorption chillers

Water-cooled chillers

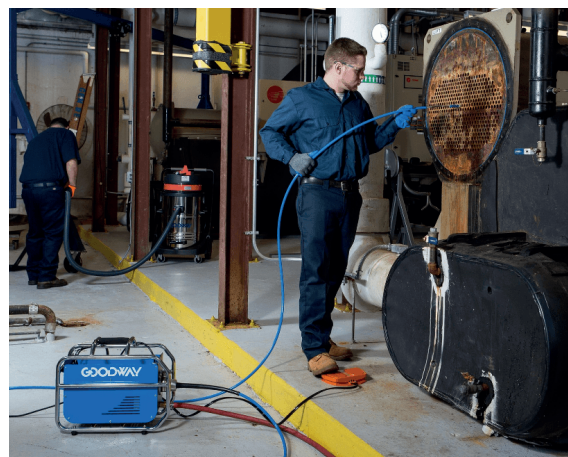

Use the RAM-PRO to clean systems from well-known suppliers and manufacturers, such as: Carrier, York, TRANE, ENGIE, Daikin, and more.

For the tube cleaning of sea water condensers on board of our vessels we are using several RAM-PRO and RAM-4 systems. The tube cleaners do the job seamlessly in combination with the rotating brushes.

Parlevliet & Van der Plas - The Netherlands

Necessary items for tube cleaning

Goodway flexible shafts and brushes are required to be able to clean tubes.

Professional rotary tube cleaning system

The RAM-PRO is an easy-to-use tube cleaning system which is very compact and relatively lightweight. Therefore, it's preferred by operators and engineers who have to work in tight spaces. It also features a bi-directional footswitch which allows brushes to rotate both ways, increasing the cleaning results. The RAM-PRO is often used with nylon brushes to remove fouling from heat exchanger- and chiller tubes, think of deposits like algae: silt, mud, biological fouling (biofilm), and light scaling.

Specifications RAM-PRO

The Goodway RAM-PRO is an easy-to-use tube cleaning system and very effective for cleaning heat exchangers of all sorts. Constructed with high quality components, this tube cleaning system is designed for years of use.

- Fixed brush rotation speed at 862,5 RPM
- Connect shafts and brushes in seconds due to quick-connect system
- Bi-directional rotation of brushes
- Water requirements: min. 2 BAR at 7,5 LPM
- Available in 230V, 50/60Hz or 115V, 50 or 60Hz
- 51 x 23 x 41 cm (L x W x H) – 15,8 KG
