

# Spin Grit (SGB)

## tube cleaning brushes

The SGB nylon brushes are Goodway's most effective tube cleaning brushes, designed to remove soft, medium, and medium-hard deposits in heat exchanger tubes. The abrasive, impregnated nylon bristles of the brush clean and polish tubes in one step. Unlike regular spiral brushes, the Spin-Grit is designed to be oversized in the tube, so the bristles lay over, putting the abrasive in contact with the tube wall.

SGB brushes are available for tube inner diameters 15 – 30 mm.

### Tube cleaning applications

Absorption chillers

Water-cooled chillers

Use the SGB brushes to remove various deposits in heat exchanger tubes of: Carrier, York, Kelvion, TRANE, ENGIE, and Daikin machines.

### Goodway tube cleaning systems

RAM-PRO

RAM-4

RAM-PRO-XL

SGB brushes can be used in combination with any Goodway tube cleaning system and blue flexible shafts. These brushes are used the most with the above shown tube cleaners.

### SGB brushes are available in:

Quick connect

Standard threading

All Goodway chiller tube cleaning systems are supplied with a dual foot switch, therefore we recommend using quick connect accessories.

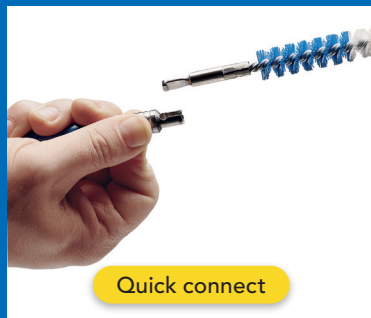

### Features of the SGB brushes

SGB are durable and long-lasting brushes which are designed to remove deposits easily and quickly without damaging the tube material. Even delicate base metals like copper/nickel, titanium, and brass remain unharmed.

- 1 Abrasive nylon strands significantly increase the cleaning effect and also optimize the lifetime.
- 2 Quick connect allows for quick changeover of brushes as well as bi-directional rotation.

Abrasive strands
