Solus

Built-in is easy! Steel side glass panels are already mounted. The standard front faced fire can easily be transformed to a corner or panoramic fire by removing the side panels.

Whether you are planning on creating the ultimate social hub, or simply increasing the wow-factor of your living room, make every detail matter with a Solus appliance from Trimline Fires.

Seeing is believing. Scan this QR code for a video experience that will change the way you think about electric fires.

Optional ambient lighting

Extend the atmosphere beyond the fire and into the room using a Solus ambient lighting kit, allowing you to create a further interactive dimension to the environment. This additional lighting features 15 colour modes and can be controlled by the appliance remote control or via your smart device.

The kit features a 3 metre length of RGB LED strip light and up to two kits can be simultaneously connected to a Solus appliance, making it the perfect addition to fire suites and media walls.

Setting the scene

Our approach is to create beautiful, inspiring appliances that change the perception of a traditional electric fire.

With a Solus fire, you are in control of every aspect of your appliance, from the speed, colour and brightness of the entrancing flames to the enchanting crackling sounds of burning logs, or the complementing ambient lighting of your extended living space.

Our unique TriLight technology provides multi angled, fully customisable dynamic LED lighting to create thousands of unique colour and tonal combinations to the flames and fuel bed. Each can work in harmony with one another or can work independently to create a unique juxtaposed combination to create a truly unique atmosphere. All at the touch of a button.

To provide an insight into the possibilities, all Solus fires come with 6 programmed themes to highlight some of the fascinating lighting combinations that can be created. These are:

Autumn Campfire

Ember Glow

Inferno

Noir

Fire & Ice

Nebula

Instant heat at your fingertips

Part of the Solus design ethos is to ensure that all appliances offer clear and simple controllability. Whilst functionality may have advanced and become more dynamic, we believe that intuitive interaction is paramount.

The Solus fires can be conveniently controlled in three ways:

- Manually using the multi-function panel discretely located on the appliance.
- With the intuitive remote-control handset, that comes standard.
- Through your smart device (such as phone or tablet) using Wi-Fi connectivity.

With built in Wi-Fi connectivity, enhance your user experience with our smart app enabling you to control your appliance from anywhere! The app allows you to set tailored programmes, schedule on/off times, set temperatures, design custom light effects, plus much more.

The quick start heat option allows you to select low heat (0,9kW) high heat (1,8kW) or cool blow at the touch of a button. Whilst adaptive smart heating allows you to schedule the exact time and date you wish to heat your room, automatically adjust the environment to reach and maintain the desired temperature.

We are committed to a sustainable future, ensuring that our appliances make the most efficient use of energy. All Solus appliances benefit from temperature detection and regulation technology; if there is sudden drop in room temperature, perhaps caused by an open window or door, the appliance will temporarily deactivate any heating functions to avoid energy wastage and will reactivate when the window or door is closed.

Front, Panoramic, Corner models

PRODUCT DIMENSIONS

All dimensions are in millimetres.

Quality

The Solus Collection is built on nearly 70 years of experience in the fireplace industry. Using traditional skills alongside modern design methods to create unique, high quality stylish and functional products.

Quality excellence is an integral aspect of all our appliances. Our meticulous attention to detail, high standards and quality craftsmanship means you can be confident in choosing a Solus electric fire.
