WHO ARE WE?

We are a Polish company which has been operating in the market for over 25 years. Our strengths, apart from many years of experience, are a good team of employees and proven technological solutions. We know all our products inside out. We vouch for their quality, functionality and, above all, safety. We only produce gas heaters that we would like to use ourselves. A quarter of a century of continuous development and improvement has enabled us to clearly define our goals and the values we hold dear. Our motto is „We give you heat“. We want you to feel comfortable while spending time with your loved ones – during family meetings, parties with friends, relaxing after a long and exhausting day. We will be very pleased if there is a place for Vulkan products on your terrace, patio or in your garden.

OUR VALUES

PRODUCTION STANDARDS

We do not import ready-made products from China. All our heaters are manufactured in a production plant in Pszczyna, by qualified staff, on the basis of the best attested materials and with the use of constantly modernised machinery.

SECURITY

All our gas heaters are equipped with a number of features, such as protection against uncontrolled gas discharge from the burner or an installed tilt switch, and are subject to a meticulous final inspection, including a leak test and flame safety test.

PRICE				

ETNA HEATER

Gas heater with high heating efficiency and innovative burner design with afterburner function. It combines the characteristics of a heating umbrella with the safe and effective flame of a torch.

EFFICIENCY AND POWER – thanks to the special burner with air mixing system, thermal efficiency is more than 30% higher than with traditional heaters, while gas consumption is low (0.59-0.72 kg/h).

SAFE, CERTIFIED PRODUCT – one of the key elements of the design is the automatic shut-off system in the event of sudden tipping. The safety of the construction has been confirmed by the CE mark.

EASY INSTALLATION – the construction of our heater was developed in Poland, most of the parts of which it is composed were also made in Poland, and only few elements come from renowned European factories.

HEKLA HEATER

The heater is a compromise between high efficiency and application of top design solutions and relatively small size. It ensures high thermal efficiency (higher by over 30% than traditional heaters) with simultaneous low gas consumption.

SAFE, CERTIFIED PRODUCT – construction equipped with an automatic shut-off system in case of sudden tilt and protection against gas flow, when the burner is extinguished.

EASY ASSEMBLY – the assembly is simple and pleasant, and does not require any special tools or technical expertise. Easy to assemble with clear instructions.

CLEVER, HYBRID CONSTRUCTION – Hekla retains all the technical features of higher models, yet is designed to be easily portable or to replace the gas cylinder.

HELENA HEATER

The smallest heater in the offer, combining compact dimensions with high heat efficiency, and thanks to its lower height, compared with other heaters (165 cm), it is perfect for places where you want to warm up in a sitting position (terrace, arbour, garden).

COMPACT SIZE – a well-thought-out construction allows for maximum heating effect at the height appropriate for people sitting on arm-chairs, chairs or at the table.

POLISH PRODUCT – Helena is the fruit of Polish technical know-how; its production also takes place in Poland, using some elements manufactured in Europe.

SERVICE AND MAINTENANCE ON SITE – we have a full range of spare parts and accessories, and should you require service or maintenance, our expert technicians will provide their expertise on site.

Power

WATRA HEATER

A heater designed for those who, apart from high thermal efficiency, value designer looks. With Watra you will feel like by a traditional highlander bonfire, but in the 21st century!

POLISH PRODUCT – although Watra has been entirely designed and manufactured in Poland, it can decorate terraces and gardens (as well as hotels and restaurants) all over the world, from Milan to Singapore.

SERVICE AND MAINTENANCE ON SITE – we have a full range of spare parts and accessories, and should you require service or maintenance, our expert technicians will provide their expertise on site.

EFFECTIVE DESIGNER CONSTRUCTION – the fire is visible from all sides, while the burner, which gives a beautiful visual effect, resembles a traditional campfire, protected from the wind by toughened glass.
