## INSTALLATION METHODS:

### I. Using a Guide Wire with S-hooks or zip ties (not included)

## How to install it properly

① Screw existing lamps by holding the socket in one hand and twisting the lamp clockwise. Lamps may be tight in the sockets.

② Lace with a medium base lamp. Screw the bulb into the socket clockwise until top of the socket forms a tight seal around the bulb and the bulb makes solid contact with the socket.

## Caution:

**Risk of Electric Shock.** (Avoid making connections or disconnections when the equipment is wet. Do not submerge. Keep lamps at least 16 feet from pools and spas. Keep receptacles dry).

(1) Light sockets must be installed base on so that bulbs are facing down only.

(2) Not intended for installation in ceilings, sofa, cabinets or other enclosed spaces.

(3) Keep bulbs from combustible material. Do NOT allow lamps or sockets to come into contact with fabrics associated with shades, blinds or other materials. The bulb is at least 3 inches away from the nearest object.

(4) Do not cluster the bulbs. (5) Disconnect power at source prior to wiring, re-lamping or servicing in any way.
